The Imperfect and Unfinished Math Teacher [Grades K-12] Chase Orton, 2022-02-24 The system won't do it for us But we have each other In The Imperfect and Unfinished Math Teacher A Journey to Reclaim Our Professional Growth master storyteller Chase Orton offers a vulnerable and courageous grassroots guide that leads K-12 math teachers through a journey to cultivate a more equitable inclusive and cohesive culture of professionalism for themselves what he calls professional flourishing The book builds from two bold premises First that as educators we are all naturally imperfect and unfinished and growth should be our constant

goal Second that the last 40 years of top down PD efforts in mathematics have rarely supplied teachers with what they need to equitably grow their practice and foster classrooms that are likewise empowered inclusive and cohesive With gentle humanity this book inspires teachers to break down silos observe each others classrooms interrogate their own biases and put students at the center of everything they do in the math classroom This book Weaves raw and authentic stories both personal and those from other educators into a relatable and validating narrative Offers interactive opportunities to self reflect build relationships seek new vantage on our teaching by observing others classrooms and students and share and listen to other s stories and experiences Asks teachers to give and accept grace as they work collaboratively to better themselves and the system from within so that they can truly serve each of their students authentically and equitably Implementing the beliefs and actions in this book will position teachers to become more active partners in each other s professional growth so that they can navigate the obstacles in their professional landscape with renewed focus and a greater sense of individual and collective efficacy It equips teachers and by extension their students to chart their own course and author their own equitable and joyful mathematical and professional stories

**Rethinking School Mathematics** Andrew Noyes, 2007-05-21 Why is it that so many pupils are put off by maths seeing it as uninspiring and irrelevant and that so many choose to drop it as soon as they can Why is it socially acceptable to be bad at maths Does the maths curriculum really prepare pupils for life This book presents some answers to these questions helping teachers to think through their own attitudes to teaching and learning and to work with pupils towards more effective and inspiring mathematical engagement Part I of the book explores the nature of school mathematics showing how the curriculum has been developed over the years and how increasing effort has been devoted to improving the quality of mathematics teaching with little apparent effect Part II focuses on ways of thinking about classroom mathematics which take account of social cultural political and historical aspects The chapters bring together a collection of activities resources and discussion which will help teachers develop new ways of teaching and learning maths This book will be essential reading for all maths teachers including maths specialists on initial teacher training courses
