Spectroscopy Thomas Engel, Warren J. Hehre, 2010 This full color modern physical chemistry reference offers compelling applications and arresting illustrations that capture readers attention and demonstrate the dynamic nature of the subject The authors focus on core topics of physical chemistry presented within a modern framework of applications Modern applications

are drawn from biology environmental science and material science Spectroscopy applications are introduced early in concert with theory for example IR and rotational spectroscopy are discussed immediately after the harmonic oscillator and the rigid rotar Modern research is featured throughout along with new developments in the field such as scanning tunneling microscopy bandgap engineering quantum wells teleportation and quantum computing From Classical to Quantum
