 The Nutrition and Health series has been very fortunate to have each of the volumes recognized by rating services such as  
 Doody s as valuable contributions for health professionals and individuals interested in the most up to date and balanced  
 information from the experts in nutrition These independent accolades may have occurred because the Nutrition and Health  
 series has as its overriding mission to provide health profession als with texts that are considered essential because each  
 book includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective  
 fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of  
 paradigm shifts and the con sequences 7 virtually no overlap of information between chapters but targeted inter  
 chapterreferrals 8 suggestions of areas for future research and 9 balanced data driven answers to patient questions which  
 are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of  
 a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter

as well as in the choice of chapter authors The international perspective especially with regard to public health initiatives is emphasized where appropriate Lippincott Williams and Wilkins' Administrative Medical Assisting Elizabeth A.
