Relations,2012 **The Politics of Academic Autonomy in Latin America** Fernanda Beigel,2016-03-03 Academic autonomy has been a dominant issue among Latin American social studies given that the production of knowledge in the region has been mostly suspected for its lack of originality and the replication of Euro American models Politicization within the higher education system and recurrent military interventions in universities have been considered the main structural causes for this heteronomy and thus the main obstacles for scientific achievements This groundbreaking book analyses the struggle for academic autonomy taking into account the relevant differences between the itinerary of social and natural sciences the connection of institutionalization and prestige building professionalization and engagement From the perspective of the periphery academic dependence is not merely a vertical bond that ties active producers and passive reproducers Even though knowledge produced in peripheral communities has low rates of circulation within the international academic system this doesn't imply that their production is or always has been the result of a massive import of foreign concepts and resources This book intends to show that the main differences between mainstream academies and peripheral circuits are not precisely in the lack of indigenous thinking but in the historical structure of academic autonomy which changes according to a set of factors mainly the role of the state in the higher education system This historical structure explains the particular features of the process of professionalization in Latin American scientific fields *International Journal of Economic and Political Integration: Vol.1, No.1* ,2011-09-28 Balance of Payments Statistics Yearbook, 2010 International Monetary Fund. Statistics Dept.,2010-11-29 The BOPS Yearbook usually published in December contains balance of payments statistics for most of the world compiled in accordance with the IMF's Balance of Payments Manual Part 1 includes aggregate as well as detailed information in the form of analytical and standard component presentations for countries Part 2 provides tables of data featuring area and world totals of balance of payments components and aggregates Part 3 presents descriptions of methodologies compilation practices and data sources used by individual member countries in compiling their balance of payments and international investment position statistics **Research Frontiers on the International Marketing Strategies of Chinese Brands** Zuohao Hu,Xi Chen,Zhilin Yang,2016-08-05 This book proposes a theoretical framework identifying external and internal factors that influence internationalization strategy of Chinese brands and brand performance It explores several key strategies e.g standardization versus adaptation price leadership versus branding OBM export versus OEM export and incremental versus leap forward internationalization model The relationships are examined between various international marketing mix e.g distribution channel and pricing strategies and brand performance Through case studies the text also analyses the internationalization of contract based firms **A Review of U.S. Diplomatic Readiness** United States. Managing Openness Mona Haddad, Ben Shepherd, 2011 The global financial crisis triggered a broad reassessment of economic integration policies in developed and developing countries worldwide The crisis induced collapse in trade was the sharpest ever since World War II affecting all countries and all product categories A huge shock to the trading system combined with severe macroeconomic instability makes it natural for policymakers to call into question the basic underlying assumptions of trade liberalization and openness In particular outward oriented or export led growth strategies are being reassessed as openness is increasingly associated with greater volatility However it is crucial not to lose sight of the dynamic benefits that openness can offer Examples include technology transfer increased competitive pressure that reduces markups and improves efficiency and economies of scale The real question is how to manage outward oriented strategies so as to maximize the benefits of openness while minimizing risks This book aims to contribute to this important and ongoing policy debate bringing together recent empirical work on the trade collapse its causes and consequences and the broader trade policy agenda in the post crisis environment It addresses critical policy issues revolving around the topic of outward oriented growth strategy including policy instruments that help manage risks associated with outward orientation lessons learned from the crisis for particular countries and regions and how emerging trade policy issues such as climate change commodities global production networking and migration affect the prospects for recovery and outward oriented growth
