**Handwriting Features Guide** Nicole Crown, Raymond Marquis, Carolyn Bird, 2024-06-14 Forensic handwriting examination follows a process comprised of four main steps Analysis Comparison Evaluation and Verification ACE V While the process itself has been described and refined very little effort has been undertaken to establish a clear and detailed list of features that the forensic handwriting examiner FHE must analyse in the first step of the examination In depth analysis of graphical features of handwritten texts or signatures is integral to the work of FHEs when requested to give an expert opinion typically to determine whether a questioned handwritten item has been written by a specific writer Indeed it is these graphical features that will be compared between questioned and known samples to establish similarities and differences that will finally be evaluated under two or more mutually exclusive propositions to reach a conclusion A robust analysis based on clearly defined features is necessary to provide reliable and unbiased opinions Numerous books and articles describe handwriting features that should be observed during the analysis stage of the examination However the descriptions can be vague and several authors may use different terms to describe the same feature It may also happen that the same term is used to define different characteristics Moreover illustrations of terms are often scarce and some times of little help to understand what the corresponding features are These problems are exacerbated when trying to equate terms in different languages This project presents a comprehensive depiction of writing features particularly found in Latin script relating to the whole hand written text or signature which the authors consider relevant to help answer questions commonly addressed by FHEs It is the authors hope that the FHE community utilises this illustrated list of writing features which we believe can promote a thorough and complete analysis and provide a common language for FHEs Thus this project seeks to contribute to establishing a systematic and standardized approach to forensic handwriting examination and move the discipline towards reproducibility and validation *Assessment of the Forensic Sciences Profession* Forensic Sciences Foundation (U.S.), 1977

**FORENSIC SIGNATURE EXAMINATION** Steven A. Slyter, 1995-01-01 What exactly is forensic signature examination Is the comparison of signatures really a science How is it done How can one become trained in this discipline What are the parameters which guide the expert in reaching an opinion What effects do health drugs or alcohol have on signature skills Can a signature include obvious differences and still be genuine At what point do differences become significant How does an attorney work with an expert in this field What documents and materials will be needed How can a document expert explain the details of this work to a jury How does an attorney effectively cross examine a document expert **FORENSIC SIGNATURE EXAMINATION** answers these questions The reader will learn how the scientific method is applied to signature examination how to define the parameters which guide decision making and how forgeries can be recognized Students will find this to be

a sensible approach to the study of signature examination Document examiners will find a method for explaining their work to clients and to the court Attorneys will find that they can take the magic out of a signature examination so their own witness is more credible or an opposing witness held to a more effective cross examination For attorneys document examiners and students here is a straightforward systematic explanation of why we can rely on signatures as a means of identification and how the habits of pen rhythm and character design can be analyzed
