The paintings are not about people; they are about images. They are about the negative stereotypes that African Americans still buy into. What if the Jews never talked about the holocaust?" (Cohen, 3). Michael Ray Charles explains, due to the colossal amount of hate mail he has received about his paintings. The Forever Free Post lithograph series, like most of Charles work, reveals an unnerving message to African-Americans and Caucasians alike. The resurrection of nineteenth and twentieth century iconic ad icons such as Sambo and Mammy, are more disturbing in the twenty-first century in the climate of tolerance we live in. This doesn't stop Charles from recreating timeless imagery to challenge our perception of race. Nor does it seem to affect the value of this neo-traditionalists work. Charles' paintings and lithographs can be found all over the world at contemporary art museums in New York, London, Milan, Amsterdam and more. The Forever Free Post is series containing five lithographs which are stylized as nineteenth century circus and product advertisement posters. These lithographs are on woven paper, and were created with Charles' signature painting technique of oil wash and copper, distinguishing the look of the past. His signature, a copper penny with the Abraham Lincoln up represents society's lowest value, the penny, which ironically is a different color than all other American coin currency. Charles, Michael Ray. Forever Free Post. 1995. Lithograph. Private Collection, New York. Charles, a Louisiana native, graduated from McNeese State University in 1989 where he earned a BFA in advertising and design. From there he continued his education at the University of Texas where he received an MFA and later became a teacher at that same university. Charles' formal art and marketing focus is reflected in everything he creates; he is obsessed with communications. The influences of marketing and consumption on the masses is why he started digging up and analyzing these nineteenth century images. What was the motive behind blackface and other racially driven marketing? What type of values did these messages create and what stereotypes did they perpetuate? Challenging these questions became Charles' personal dissertation. Many African Americans have criticized his work, claiming Charles is capitalizing on imagery that is shameful to the African-American Heritage. Which Charles replies, "These images are about deconstructing symbols and tracing their history, past and present. They should make everyone uncomfortable." (Heller 8) The two-dimensional lithograph above of an African-American lady liberty is a representation of the stereotypical single mom, welfare recipient. The lady liberty, with the emphasized Sambo smile depicting a watermelon, is fulfilling the American dream which is why her hair is blonde. The picture of the baby carriage is part of this false believe system propagated by many politicians over the decades. This image is alluding to the idea that African-American woman have as much children as they possibly can in order to collect more welfare and receive higher tax returns. The stamp that reads, Free as Always on the right side of the lithograph is another racial construct that African-Americans expect everything for free. This image alludes to the rationalities that African-Americans are lazy and will...

Glotfelter, Caitlin Martin, Mandy Olejnik, Ann Updike, Elizabeth Wardle, 2022-12-28 *Changing Conceptions Changing Practices* demonstrates that it is possible for groups of faculty members to change teaching and learning in radical ways across their programs despite the current emphasis on efficiency and accountability. Relating the experiences of faculty from disciplines as diverse as art history, economics, psychology, and philosophy, this book offers a theory and research based heuristic for helping faculty transform their courses and programs as well as practical examples of the heuristic in action. The authors draw on the threshold concepts framework research in writing studies and theories of learning, leadership, and change to deftly explore why faculty are often stymied in their efforts to design meaningful curricula for deep learning and how carefully scaffolded professional development for faculty teams can help make such change possible. This book is a powerful demonstration of how faculty members can be empowered when professional development leaders draw on a range of scholarship that is not typically connected. In today's climate, courses, programs, and institutions are often assessed by and rewarded for proxy metrics that have little to do with learning, with grave consequences for students. The stakes have never been higher, particularly for public higher education. Faculty members need opportunities to work together using their own expertise and to enact meaningful learning opportunities for students. Professional developers have an important role to play in such change efforts. WAC scholars and practitioners, leaders of professional development and centers for teaching excellence, program administrators, and curriculum committees from all disciplines and faculty innovators from many fields will find not only hope but also a blueprint for action in *Changing Conceptions Changing Practices*. Computational Formalism Amanda Wasielewski, 2023-05-23 How the use of machine learning to analyze art images has revived formalism in art history presenting a golden opportunity for art historians and computer scientists to learn from one another Though formalism is an essential tool for art historians much recent art history has focused on the social and political aspects of art But now art historians are adopting machine learning methods to develop new ways to analyze the purely visual in datasets of art images Amanda Wasielewski uses the term computational formalism to describe this use of machine learning and computer vision technique in art historical research At the same time that art historians are analyzing art images in new ways computer

scientists are using art images for experiments in machine learning and computer vision Their research says Wasielewski would be greatly enriched by the inclusion of humanistic issues The main purpose in applying computational techniques such as machine learning to art datasets is to automate the process of categorization using metrics such as style a historically fraught concept in art history After examining a fifteen year trajectory in image categorization and art dataset creation in the fields of machine learning and computer vision Wasielewski considers deep learning techniques that both create and detect forgeries and fakes in art She investigates examples of art historical analysis in the fields of computer and information sciences placing this research in the context of art historiography She also raises questions as which artworks are chosen for digitization and of those artworks that are born digital which works gain acceptance into the canon of high art
