Fuzzy Logic with Engineering Applications Timothy J. Ross, 2005-04-08 Fuzzy logic refers to a large subject dealing with a set of methods to characterize and quantify uncertainty in engineering systems that arise from ambiguity imprecision fuzziness and lack of knowledge Fuzzy logic is a reasoning system based on a foundation of fuzzy set theory itself an extension of classical set theory where set membership can be partial as opposed to all or none as in the binary features of classical logic Fuzzy logic is a relatively new discipline in which major advances have been made over the last decade or so with regard to theory and applications Following on from the successful first edition this fully updated new edition is therefore very timely and much anticipated Concentration on the topics of fuzzy logic combined with an abundance of worked examples chapter problems and commercial case studies is designed to help motivate a mainstream engineering audience and the book is further strengthened by the inclusion of an online solutions manual as well as dedicated software codes Senior undergraduate and postgraduate students in most engineering disciplines academics and practicing engineers plus some working in economics control theory operational research etc will all find this a valuable addition to their bookshelves

*Graded Logic* Jozo Dujmović,2025-09-19 Observable human commonsense reasoning can be modeled with graded propositional logic Our approach is distinctive in that all mathematical models are directly linked to specific observable and explainable mental activities Decision makers evaluate alternatives through perceived gradations of truth importance suitability simultaneity and substitutability Each graded variable has a semantic identity reflecting its role and meaning tied to the goals and interests of a specific decision maker Graded logic was introduced 50 years ago and this book presents its current status based on a half century of improvements and applications

The book includes examples of decision problems solved using graded logic models Our aim is to provide readers with a solid theoretical foundation in graded propositional calculus enabling them to confidently apply the LSP method on complex evaluation and decision problems Additionally the book suggests numerous directions for future research and applications

**Risk Assessment Technologies, and Transportation, Storage, and Disposal of Radioactive Materials** F. L. Cho,R. S. Hafner,1998 Proceedings of a symposium which was a by product of the July 1998 Conference Twenty five contributions deal with technological innovations and with their implementation in such areas as estimating human error probabilities hazard analysis treating PRA source data developing risk informed service inspections safety and reliability analyses and environmental safety level assessment Most of the papers in the section on risk assessment technologies deal with the combination method of probabilistic considerations and fuzzy measures on many disastrous phenomena of some risk significance The discussions of transportation storage and disposal of radioactive materials address engineering and regulatory issues Contains an author index but no subject index Annotation copyrighted by Book News Inc Portland OR

Project Scheduling Erik Leuven Demeulemeester,Willy S. Herroelen,2006-04-11 Our objectives in writing Project Scheduling A Research Handbook are threefold 1 Provide a unified scheme for classifying the numerous project scheduling problems occurring in practice and studied in the literature 2 Provide a unified and up to date treatment of the state of the art procedures developed for their solution 3 Alert the reader to various important problems that are still in need of considerable research effort Project Scheduling A Research Handbook has been divided into four parts Part I consists of three chapters on the scope and relevance of project scheduling on the nature of project scheduling and finally on the introduction of a unified scheme that will be used in subsequent chapters for the identification and classification of the project scheduling problems studied in this book Part II focuses on the time analysis of project networks Part III carries the discussion further into the crucial topic of scheduling under scarce resources Part IV deals with robust scheduling and stochastic scheduling issues Numerous tables and figures are used throughout the book to enhance the clarity and effectiveness of the discussions For the interested and motivated reader the problems at the end of each chapter should be considered as an integral part of the presentation Image Processing and GIS for Remote Sensing Jian Guo Liu,Philippa J. Mason,2016-01-04 Following the successful publication of the 1st edition in 2009 the 2nd edition maintains its aim to provide an application driven package of essential techniques in image processing and GIS together with case studies for demonstration and guidance in remote sensing applications The book therefore has a 3 in 1 structure which pinpoints the intersection between these three individual disciplines and successfully draws them together in a balanced and comprehensive manner The book conveys in depth knowledge of image processing and GIS techniques in an accessible and comprehensive manner with clear explanations and conceptual illustrations used throughout to enhance student learning The understanding of key concepts is always emphasised with minimal assumption of prior mathematical experience The book is

heavily based on the authors own research Many of the author designed image processing techniques are popular around the world For instance the SFIM technique has long been adopted by ASTRIUM for mass production of their standard Pan sharpen imagery data The new edition also includes a completely new chapter on subpixel technology and new case studies based on their recent research     Robot Science & Technology ,1998     **Eco-hydraulic Modelling of Eutrophication for Reservoir Management** Nahm-chung Jung,2010-05-11 This study presents an systematic approach to water quality assessment hybrid modelling and decision support for eutrophication management in deep reservoirs It is found that during the summer monsoon the catchment runoff into the Yongdam reservoir induces a transfer of pollutants from a middle stratified layer to the surface layer Although the     Essential Image Processing and GIS for Remote Sensing Jian Guo Liu,Philippa J. Mason,2013-04-10 Essential Image Processing and GIS for Remote Sensing is an accessible overview of the subject and successfully draws together these three key areas in a balanced and comprehensive manner The book provides an overview of essential techniques and a selection of key case studies in a variety of application areas Key concepts and ideas are introduced in a clear and logical manner and described through the provision of numerous relevant conceptual illustrations Mathematical detail is kept to a minimum and only referred to where necessary for ease of understanding Such concepts are explained through common sense terms rather than in rigorous mathematical detail when explaining image processing and GIS techniques to enable students to grasp the essentials of a notoriously challenging subject area The book is clearly divided into three parts with the first part introducing essential image processing techniques for remote sensing The second part looks at GIS and begins with an overview of the concepts structures and mechanisms by which GIS operates Finally the third part introduces Remote Sensing Applications Throughout the book the relationships between GIS Image Processing and Remote Sensing are clearly identified to ensure that students are able to apply the various techniques that have been covered appropriately The latter chapters use numerous relevant case studies to illustrate various remote sensing image processing and GIS applications in practice     **Web-Based Multimedia Advancements in Data Communications and Networking Technologies** Sridhar, Varadharajan,Saha, Debashis,2012-08-31 This book highlights comprehensive research that will enable readers to understand manage use and maintain business data communication networks more effectively Provided by publisher     **Intelligent Systems for Science and Information** Liming Chen,Supriya Kapoor,Rahul Bhatia,2014-01-25 The book Intelligent Systems for Science and Information is the remarkable collection of extended chapters from the selected papers that were published in the proceedings of Science and Information SAI Conference 2013 It contains twenty four chapters in the field of Intelligent Systems which received highly recommended feedback during SAI Conference 2013 review process All chapters have gone through substantial extension and consolidation and were subject to another round of rigorous review and additional modification These chapters represent the state of the art of the cutting edge research and technologies in related areas and can help inform relevant research communities and
