Security Entrepreneurs Alexandra Gheciu, 2018-05-10 Focusing on four East European polities Bosnia Serbia Bulgaria and Romania this book examines the dynamics and implications of processes of commercialization of security that have occurred following the collapse of communist regimes These processes have been central to post communist liberalization and have profoundly shaped those states and their integration into European institutional structures and global economic and political circuits They have also affected and been shaped by the behaviour and power of regional and global actors e g European institutions regional and global corporations in Eastern Europe By virtue of the fact that they combine in complex ways local national regional and global dynamics and actors processes of security commercialization in the former Eastern bloc can be seen as instances of glocalization Several aspects of security commercialization are particularly important To begin with private actors specifically private security companies PSCs have been reconstituted as partial agents of public power As such they have come to be systematically involved in performing security practices traditionally associated with the state In addition a potent commercial logic has come to permeate public security institutions This has led to redefinition of the relationship between the state and its population in ways that defy conventional wisdom about the role of the state and pose difficult normative challenges More broadly processes of security commercialization in Eastern Europe which involve important performative dimensions have led to the emergence of complex hybrid networks of security providers that transcend domestic international public private boundaries and behave in many ways as entrepreneurs

Rules governing enforced removals from the UK Great Britain: Parliament: House of Commons: Home Affairs Committee,2012-01-26 The inquiry launched following the death of Jimmy Mubenga on a deportation flight from the UK found that although there were some positive aspects of the process which is carried out on the UK Border Agency s behalf by a private security contractor initially G4S and since 1 May 2011 Reliance Security the Committee found evidence of inappropriate use of physical restraint and the possible use of unauthorised and potentially dangerous restraint techniques weaknesses in passing on information about detainees medical conditions to all the relevant staff Use of racist language by contractors Use of excessive numbers of

contractor staff The Committee recommends that the UK Border Agency should strengthen its procedures so that its own staff feel that they are entitled and expected to challenge any poor conduct on the part of contractors The Committee also rejects the practice of taking detainees to the airport as reserves in case another detainee is taken off a removal flight at the last minute To strengthen safeguards against the ill treatment of prisoners the Committee recommends that members of the Independent Monitoring Boards for immigration removal centres or a similar independent monitoring network be given access to chartered removal flights

Security Boot Camp Mr Dean McBride, 2025-07-14 In this Security Boot Camp I am teaching old school security ethics aka Real Security for Real People It is at this point you should know if security is for you whatever you have experienced if you have worked in security already you will have experienced 95% of the wrong way to do things Complacency will sliver like a snake through all the dealings of sites where professionalism is absent I have covered the core learning and my intention is to convey the message of change which I believe I have done so apply this boot camp to your sites and watch them improve and your rise to stardom from Inexperienced to Ambassador to Asset I hope you will take my lead from this book to aid all security personnel and security companies to breach that 95% divide of complacency and bring balance back to the security industry and be the change in the security industry

Global Unions, Local Power Jamie K. McCallum, 2013-10-17 News about labor unions is usually pessimistic focusing on declining membership and failed campaigns But there are encouraging signs that the labor movement is evolving its strategies to benefit workers in rapidly changing global economic conditions Global Unions Local Power tells the story of the most successful and aggressive campaign ever waged by workers across national borders It begins in the United States in 2007 as SEIU struggled to organize private security guards at G4S a global security services company that is the second largest employer in the world Failing in its bid SEIU changed course and sought allies in other countries in which G4S operated Its efforts resulted in wage gains benefits increases new union formations and an end to management reprisals in many countries throughout the Global South though close attention is focused on developments in South Africa and India In this book Jamie K McCallum looks beyond these achievements to probe the meaning of some of the less visible aspects of the campaign Based on more than two years of fieldwork in nine countries and historical research into labor movement trends since the late 1960s McCallum's findings reveal several paradoxes Although global unionism is typically concerned with creating parity and universal standards across borders local context can both undermine and empower the intentions of global actors creating varied and uneven results At the same time despite being generally regarded as weaker than their European counterparts U S unions are in the process of remaking the global labor movement in their own image McCallum suggests that changes in political economy have encouraged unions to develop new ways to organize workers He calls these governance struggles strategies that seek not to win worker rights but to make new rules of engagement with capital in order to establish a different terrain on which to organize
