Healthy, Resilient, and Sustainable Communities After Disasters Institute of Medicine, Board on Health Sciences Policy, Committee on Post-Disaster Recovery of a Community's Public Health, Medical, and Social Services, 2015-09-10 In the devastation that follows a major disaster there is a need for multiple sectors to unite and devote new resources to support the rebuilding of infrastructure the provision of health and social services the restoration of care delivery systems and other critical recovery needs In some cases billions of dollars from public private and charitable sources are invested to help communities recover National rhetoric often characterizes these efforts as a return to normal But for many American communities pre disaster conditions are far from optimal Large segments of the U S population suffer from preventable health problems experience inequitable access to services and rely on overburdened health systems A return to pre event conditions in such cases may be short sighted given the high costs both economic and social of poor health Instead it is important to understand that the disaster recovery process offers a series of unique and valuable opportunities to improve on the status quo Capitalizing on these opportunities can advance the long term health resilience and sustainability of communities thereby better preparing them for future challenges

Healthy Resilient and Sustainable Communities After Disasters identifies and recommends recovery practices and novel programs most likely to impact overall community public health and contribute to resiliency for future incidents This book makes the case that disaster recovery should be guided by a healthy community vision where health considerations are integrated into all aspects of recovery planning before and after a disaster and funding streams are leveraged in a coordinated manner and applied to health improvement priorities in order to meet human recovery needs and create healthy built and natural environments The conceptual framework presented in **Healthy Resilient and Sustainable Communities After Disasters** lays the groundwork to achieve this goal and provides operational guidance for multiple sectors involved in community planning and disaster recovery **Healthy Resilient and Sustainable Communities After Disasters** calls for actions at multiple levels to facilitate recovery strategies that optimize community health With a shared healthy community vision strategic planning that prioritizes health and coordinated implementation disaster recovery can result in a communities that are healthier more livable places for current and future generations to grow and thrive communities that are better prepared for future adversities

Beyond Control James F. Barnett Jr., 2017-03-16 **Beyond Control** reveals the Mississippi as a waterway of change unnaturally confined by ever larger levees and control structures During the great flood of 1973 the current scoured a hole beneath the main structure near Baton Rouge and enlarged a pre existing football field size crater That night the Mississippi River nearly changed its course for a shorter and steeper path to the sea Such a map changing reconfiguration of the country's largest river would bear national significance as well as disastrous consequences for New Orleans and towns like Morgan City at the mouth of the Atchafalaya River Since 1973 the US Army Corps of

Engineers Control Complex at Old River has kept the Mississippi from jumping out of its historic channel and plunging through the Atchafalaya Basin to the Gulf of Mexico Beyond Control traces the history of this phenomenon beginning with a major channel shift around 3 000 years ago By the time European colonists began to explore the Lower Mississippi Valley a unique confluence of waterways had formed where the Red River joined the Mississippi and the Atchafalaya River flowed out into the Atchafalaya Basin A series of human alterations to this potentially volatile web of rivers starting with a bend cutoff in 1831 by Captain Henry Miller Shreve set the forces in motion for the Mississippi s move into the Atchafalaya Basin Told against the backdrop of the Lower Mississippi River s impending diversion the book s chapters chronicle historic floods rising flood crests a changing strategy for flood protection and competing interests in the management of the Old River outlet Beyond Control is both a history and a close look at an inexorable living process happening now in the twenty first century

Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke

Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arma an Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and Migration by Caner Tekin CHAPTER 2 A Forest with many trees Mapping migration governance and the dispersion of authority in Europe by Lisa Marie Borrelli Rebecca Mavin and Giorgia Trasciani CHAPTER 3 Policing Migrants in Transit and Upon Arrival The Bordering Tactic of Integration in Austria and Germany by Olivia Johnson PART B Regulations Suspension of Human Rights CHAPTER 4 Borders Exception and Sovereignty Australia s Migration Policies as Instruments of Suspension of Human Rights and

History of the Study of Landforms or the Development of Geomorphology, Volume 5 T.P. Burt, A.S. Goudie, H.A. Viles, 2022-10-20 Co published with British Society for Geomorphology This volume is the fifth in the definitive series The History of the Study of Landforms or the Development of Geomorphology Volume 1 1964 dealt with contributions to the field up to 1890 Volume 2 1973 with the concepts and contributions of William Morris Davis and Volume 3 1991 covered historical and regional themes during the classic period of geomorphology 1890 1950 Volume 4 2008 concentrated on studies of geomorphological processes and Quaternary geomorphology between 1890 and 1965 by the end of this period process based studies had become dominant Volume 5 builds on this platform covering in detail the revolutionary changes in approach that

characterized the study of geomorphology in the second half of the twentieth century It is divided into three sections the first deals with changes in approach and method the second with changes in ideas and the broader scientific context within which geomorphology is studied and the final section details advances in research on processes and landforms The volume's objective is to describe and analyse many of the developments that provide a foundation for the rich and varied subject matter of twenty first century geomorphology

The Challenges for Russia's Politicized Economic System Susanne Oxenstierna, 2015-04-10 During the early 2000s the market liberalization reforms to the Russian economy begun in the 1990s were consolidated But since the mid 2000s economic policy has moved into a new phase characterized by more state intervention with less efficiency and more structural problems Corruption weak competitiveness heavy dependency on energy exports an unbalanced labour market and unequal regional development are trends that have arisen and which this book argues will worsen unless the government changes direction The book provides an in depth analysis of the current Russian economic system highlighting especially structural and institutional defects and areas where political considerations are causing distortions and puts forward proposals on how the present situation could be remedied

Lessons From The Arctic Emily Tsui, Thomas S Axworthy, Sara French, 2020-08-06 Lessons from the Arctic The Role of Regional Government in International Affairs is a collection of articles written by twenty six leading and emerging scholars from across the circumpolar region Each author assesses and explores the processes of regional governance in the Arctic from an interdisciplinary perspective The topics include Indigenous internationalism paradiplomacy federalism global institution building and more

The Life of Permafrost Pey-Yi Chu, 2020-12-07 In the Anthropocene the thawing of frozen earth due to global warming has drawn worldwide attention to permafrost Contemporary scientists define permafrost as ground that maintains a negative temperature for at least two years But where did this particular conception of permafrost originate and what alternatives existed The Life of Permafrost provides an intellectual history of permafrost placing the phenomenon squarely in the political social and material context of Russian and Soviet science Pey Yi Chu shows that understandings of frozen earth were shaped by two key experiences in the Russian Empire and the Soviet Union On one hand the colonization and industrialization of Siberia nourished an engineering perspective on frozen earth that viewed the phenomenon as an aggregate physical structure ground On the other a Russian and Soviet tradition of systems thinking encouraged approaching frozen earth as a process condition and space tied to planetary exchanges of energy and matter Aided by the US militarization of the Arctic during the Cold War the engineering view of frozen earth as an obstacle to construction became dominant The Life of Permafrost tells the fascinating story of how permafrost came to acquire life as Russian and Soviet scientists studied named and defined it

Capitalism and the World Economy Toshiaki Hirai, 2015-02-16 Globalization is a phenomenon which has attracted much attention in the past but there are still many questions that remain unanswered This book categorizes globalization into three types Financial Globalization the collapse of the Cold War order and the

ensuing convergence toward the capitalistic system and the rise of the emerging nations The globalization of capitalism has two implications One is trust in the market economy system and support for a minimal state while another is an aspect of the Casino Capitalism as typically seen by the rampant emergence of hedge funds This book explores both the light and shadows cast by globalization endeavoring to identify both positive and problematic effects of the globalization process on the world economy For this purpose we would first examine the nature and the feature of the world capitalism in relation to globalization Then we would discuss and investigate the path along which important nations first the developed nations the USA EU and Japan followed by the emerging nations BRICs have proceeded under the influence of globalization Focusing on this phenomenon from diverse points of view which is to be taken by the first rank contributors in their fields will be extraordinarily fruitful for understanding not only the world capitalism This collection from a selection of leading international contributors will not only shed light on world capitalism as it is now but will also offer pointers as to its future directions

The Delimitation of the Continental Shelf between Denmark, Germany and the Netherlands Alex G. Oude Elferink, 2014-01-09 Alex G Oude Elferink's detailed analysis of the negotiations between Denmark Germany and The Netherlands concerning the delimitation of their continental shelf in the North Sea makes use of the full range of government archives in these three States He looks at the role of international law in policy formulation and negotiations and explores the legal context political considerations and in particular oil interests which fed into these processes He also explains why the parties decided to submit their disputes to the International Court of Justice and looks at the preparation of their pleadings and litigation strategy before the Court The analysis shows how Denmark and The Netherlands were able to avoid the full impact of the implications of the Court's judgment by sidestepping legal arguments and insisting instead on political considerations

European Energy Security and US-Russian Competition Ioanna Mavromati, 2025-10-31 This book argues that the influence of US Russian security competition on the energy policies of EU member states and on the development of a unified European energy security policy has been significantly underestimated While most previous studies have focused on internal EU dynamics and the role of Russian interests this work takes a broader perspective by examining how transatlantic rivalries have shaped European approaches to energy security By tracing the evolution of European energy security policy from the Cold War era through the present the book connects shifts in policy to the changing dynamics of US Soviet and later US Russian energy competition It demonstrates that after the Soviet Union's collapse the United States did not initially view European reliance on Russian energy as a threat However as US Russian competition intensified Washington increasingly framed Europe's dependence on Russian gas as a security risk and actively sought to block the expansion of Russian energy infrastructure into Europe The book also explores how despite the EU's early treaties being energy focused energy security only became a central foreign policy concern for the Union in the mid 2000s Ultimately the author argues that scholars of international relations must consider both great power dynamics and intra European factors to fully understand the

development of European energy policy The book will be of interest to students and researchers in geopolitics international relations energy politics regional studies and European studies *Magazines and Modern Identities* Tim

Satterthwaite, Andrew Thacker, 2023-09-21 In the late nineteenth and early twentieth century ideals of technological progress and mass consumerism shaped the print cultures of countries across the globe Magazines in Europe the USA Latin America and Asia inflected a shared internationalism and technological optimism But there were equally powerful countervailing influences of patriotic or insurgent nationalism and of traditionalism that promoted cultural differentiation In their editorials images and advertisements magazines embodied the tensions between these domestic imperatives and the forces of global modernity *Magazines and Modern Identities* explores how these tensions played out in the magazine cultures of ten different countries describing how publications drew on resisted and informed the ideals and visual forms of global modernism Chapters take in the magazines of Australia Europe and North America as well as China The Soviet Turkic states and Mexico With contributions from leading international scholars the book considers the pioneering developments in European and North American periodicals in the modernist period whilst expanding the field of enquiry to take in the vibrant magazine cultures of east Asia and Latin America The construction of these magazines modern ideals was a complex dialectical process in dialogue with international modernism but equally responsive to their local cultures and the beliefs and expectations of their readers *Magazines and Modern Identities* captures the diversity of these ideals in periodicals that both embraced and criticised the globalised culture of the technological era *The State of African Cities, 2014* United Nations Human
