The Peopling of Africa James L. Newman, 1995-01-01 Discovering the African past takes one on a journey

back to the origins of humanity over four million years ago which is where James L Newman begins his account of the continent's peoples. He ends it at the onset of the colonial era in the late nineteenth century noting that Africa and Africans deserve to be known on their own terms and to achieve this goal we need to improve our understanding of what took place before colonialism rewrote many of life's rules. African identities constitute one of Newman's main themes and thus he discusses the roles played by genetic background, language, occupation, and religion. Population distribution is the other main theme running through the book. As a geographer, the author uses regions, spaces, and places as his filters for viewing how Africans have responded through time to differing natural and human environmental circumstances. Drawing on the fields of biology, archaeology, linguistics, history, anthropology, and demography as well as geography, Newman describes the richness and diversity of Africa's inhabitants, the technological changes that transformed their lives, how they formed polities from small groups of kin to states and empires, and how they were influenced by external forces, particularly the slave trade. Maps are an important part of the book, conveying information and helping readers interrelate local, regional, continental, and global contexts. **Fundamentals of Geography**, 2010 Research Paper, 1974 Ancient Supercontinents and the Paleogeography of Earth

Lauri J. J. Pesonen, Johanna Salminen, Sten-Ake Elming, David A.D. A.D. Evans, Toni Veikkolainen, 2021-10-06. Ancient Supercontinents and the Paleogeography of Earth offers a systematic examination of Precambrian cratons and supercontinents. Through detailed maps of drift histories and paleogeography of each continent, this book examines topics related to Earth's tectonic evolution prior to Pangea, including plate kinematics, orogenic development, and paleoenvironments. Additionally, this book discusses the methodologies used, principally paleomagnetism and tectonostratigraphy, and addresses geophysical topics of mantle dynamics and geodynamo evolution over billions of years. Structured clearly with consistent coverage for Precambrian cratons, this book combines state-of-the-art paleomagnetic and geochronologic data to reconstruct the paleogeography of the Earth in the context of major climatic events such as global glaciations. It is an ideal up-to-date reference for geoscientists and geographers looking for answers to questions surrounding the tectonic evolution of Earth. Provides robust paleogeographies of Precambrian cratons based on high-quality paleomagnetic and geochronologic data and critically tested by global geological datasets. Includes links to updated databases for the Precambrian such as PALEOMAGIA and the Global Paleomagnetic Database GPMDB. Presents full-color maps of the drift histories of each continent as well as their paleogeographies. Discusses key questions regarding continental drift, the supercontinent cycle, and the geomagnetic dipole hypothesis and analyzes palaeogeography in the context of Earth's holistic evolution. Forced Migration in Eastern Africa. C. Veney, 2006-12-11. This study enriches understanding of East Africa's refugee situation by examining the conditions that gave rise to it and how the refugees themselves sought to reconstruct their lives. Focusing on the 1990s, Veney compares Kenya and Tanzania, two nations that did not generate many refugees but became important hosts for the general region. *Global Gold Production Touching Ground* Boris

Verbrugge, Sara Geenen, 2020-05-04 In recent decades gold mining has moved into increasingly remote corners of the globe. Aside from the expansion of industrial gold mining, many countries have simultaneously witnessed an expansion of labor intensive and predominantly informal artisanal and small scale gold mining. Both trends are usually studied in isolation, which contributes to a dominant image of a dual gold mining economy. Counteracting this dominant view, this volume adopts a global perspective and demonstrates that both industrial gold mining and artisanal and small scale gold mining are functionally integrated into a global gold production system. It couples an analysis of structural trends in global gold production expansion, informalization and technological innovation to twelve country case studies that detail how global gold production becomes embedded in institutional and ecological structures. *ELT* Christoph Haase, Joel Cameron Head, 2015-09-10 This volume presents a survey of the latest results and discussions in the research on English Language Teaching (ELT), bringing together researchers from four continents and 11 different countries to discuss current topics and issues in the field. In doing so, it offers a debate in a conducive and intellectually charged environment which enables the reader to gain insights into new technologies, ideas and concepts of practitioners working at very different research and teaching institutions. The papers collected in this volume provide ample evidence of the lively atmosphere and the interesting conversations present in ELT in recent years. Much has changed in the research of ELT: the field has become more technical and applied on the one hand and more theoretically informed on the other. As such, it is a particular achievement of this volume that it enables the diverse disciplines under the umbrella of ELT to communicate and exchange their approaches. It is in this way that linguists can talk to methodologists and cultural studies scholars cooperate with literary scholars. The tripartite structure of this book reflects this. The first part is dedicated to linguistic issues and contains a number of both large scale and micro scale studies. The second section collects papers from the cultural and literary studies field. The concluding segment concerns new approaches in methodology and offers two very technical contributions on CLIL.

Understanding and Reducing Persistent Poverty in Africa Christopher B. Barrett, Peter Little, Michael Carter, 2013-10-21 Prior work has shown that there is a significant amount of turnover amongst the African poor as households exit and enter poverty. Some of this mobility can be attributed to regular movement back and forth in response to exogenous variability in climate, prices, health, etc. churning. Other crossings of the poverty line reflect permanent shifts in long term well being associated with gains or losses of productive assets or permanent changes in asset productivity due for example to adoption of improved technologies or access to new higher value markets. Distinguishing true structural mobility from simple churning is important because it clarifies the factors that facilitate such important structural change. Conversely, it also helps identify the constraints that may leave other households caught in a trap of persistent structural poverty. The papers in this book help to distinguish the types of poverty and to deepen understanding of the structural features and constraints that create poverty traps. Such an understanding allows communities, local governments and donors to take

proactive effective steps to combat persistent poverty in Africa This book was previously published as a special issue of the Journal of Development Studies
