Mastroianni,2018-09-07 How could the Holocaust have happened How can people do such things to other people Questions such as these have animated discussion of the Holocaust from our earliest awareness of what had happened These questions have engaged the lay public as well as academics from many different fields Psychologists have taken an active role in trying to understand and explain the motivation thinking and behavior of all those involved in and affected by the Holocaust The present volume is in part an attempt to provide a kind of historical roadmap to the diverse psychological explanations and interpretations that have been developed by psychologists over the last several decades While many psychological discussions of the Holocaust dismiss or diminish the significance of work that antedates the Milgram obedience experiments in the early 1960s this book engages some of these earlier formulations in detail It strives to be in this sense a more complete history of psychological thought on the Holocaust As many psychologists now accept the idea that a comprehensive psychology of the Holocaust must include more than social influence the book addresses the question What then The answer can be found by looking both backward and forward in time Gordon Allport s 1954 book *The Nature of Prejudice* remains one of the best psychological attempts to grapple with the Holocaust written though that was not its primary purpose In this volume the reader will find both echoes of Allport and new ideas for ways psychologists can engage this profoundly important subject *The Pathology of Desire in Daphne du Maurier's Short Stories* Setara Pracha,2023-01-09 Following a resurgence of interest in Daphne du Maurier s writing *The Pathology of Desire in Daphne du Maurier's Short Stories* offers an overview of all her collections and a detailed reading of nine stories These contain recurrent references to the incomplete or impaired human form and are best read through a corporeal lens The criticism illustrates her importance as a cultural commentator fascinated by the results of frustrated human desire and includes a synopsis of the published collections and the stories within them to give the reader a sense of the variety of the overarching themes and the persistent force of corporeality in the stories Du Maurier is well known as a novelist but her short fiction is pivotal to understanding her position and influence as a

LeMahieu, 2015-03-01 As a field education has largely failed to learn from experience Time after time promising education

reforms fall short of their goals and are abandoned as other promising ideas take their place In *Learning to Improve* the

authors argue for a new approach Rather than implementing fast and learning slow they believe educators should adopt a

more rigorous approach to improvement that allows the field to learn fast to implement well Using ideas borrowed from

improvement science the authors show how a process of disciplined inquiry can be combined with the use of networks to

identify adapt and successfully scale up promising interventions in education Organized around six core principles the book

shows how networked improvement communities can bring together researchers and practitioners to accelerate learning in

key areas of education Examples include efforts to address the high rates of failure among students in community college

remedial math courses and strategies for improving feedback to novice teachers *Learning to Improve* offers a new paradigm

for research and development in education that promises to be a powerful driver of improvement for the nation's schools and

colleges **Women and Migration** Deborah Willis, Ellyn Toscano, Kalia Brooks Nelson, 2019-03-08 The essays in this book

chart how women's profound and turbulent experiences of migration have been articulated in writing photography art and

film As a whole the volume gives an impression of a wide range of migratory events from women's perspectives covering the

Caribbean Diaspora refugees and slavery through the various lenses of politics and war love and family The contributors

which include academics and artists offer both personal and critical points of view on the artistic and historical repositories

of these experiences *Selfies* motherhood violence and Hollywood all feature in this substantial treasure trove of women's joy

and suffering disaster and delight place memory and identity This collection appeals to artists and scholars of the humanities

particularly within the social sciences though there is much to recommend it to creatives seeking inspiration or counsel on

the issue of migratory experiences *Professionalizing Multimodal Composition* Santosh Khadka, Shyam B.

Pandey, 2023-06-15 Multimodal composition is becoming increasingly popular in university classrooms as faculty students

and institutions come to recognize that old and new technologies have enabled and even demanded the use of more than one

composing mode for communicating solving problems and keeping up with the latest discourse *Professionalizing Multimodal*

Composition embraces and enacts multimodal composition in various writing courses and programs by exploring institutional

programmatic and individual faculty initiatives for capacity building and human resource development across institutions

Academic leaders scholars and faculty who have successfully designed and launched academic programs or faculty

development initiatives discuss the theoretical and logistical questions considered in their design the outcomes they achieved and how others can emulate them This exchange of knowledge insight experiences and lessons learned among community members is critical for enabling or inspiring other programs departments and institutions to conceive design and launch academic programs or faculty development initiatives for their own faculty The larger goal of professionalizing is to work with teaching faculty to increase their interactional expertise with multimodal composition and this collection offers a set of models for how faculty can do that at their own institutions and in their own programs

Confronting the Racist Legacy of the American Child Welfare System Alan J. Dettlaff, 2023-07-28 In *Confronting the Racist Legacy of the American Child Welfare System* Alan J Dettlaff presents a call to abolish the American child welfare system due to the harm and destruction it causes Black families Dettlaff traces the origins of the modern child welfare system which emerged following the abolition of slavery to demonstrate that the harm and oppression that result from child welfare intervention are not the result of unintended consequences but rather are the clear intents of the system and the foreseeable results of the policies that have been put in place over decades By tracing the history of family separations in the United States since the era of slavery *Confronting the Racist Legacy of the American Child Welfare System* demonstrates that the intended outcomes of those separations the subjugation of Black Americans and the maintenance of white supremacy are the same intended outcomes of the family separations done today What distinguishes contemporary family separations from those that occurred during slavery is that today's separations occur under a facade of benevolence a myth that has been perpetuated over decades that family separations are necessary to save the most vulnerable children *Confronting the Racist Legacy of the American Child Welfare System* presents evidence of the vast harms that result from family separations to make a case that the child welfare system is beyond reform Rather the only solution to ending these harms is complete abolition of this system and a fundamental reimagining of the way society cares for children families and communities
