Law in the Digital Single Market Tatiana-Eleni Synodinou,Philippe Jouglex,Christiana Markou,Thalia Prastitou-Merdi,2021-06-25 With the ongoing evolution of the digital society challenging the boundaries of the law new questions are arising and new answers being given even now almost three decades on from the digital revolution Written by a panel of legal specialists and edited by experts on EU Internet law this book provides an overview of the most recent developments affecting the European Internet legal framework specifically focusing on four current debates Firstly it discusses the changes in online copyright law especially after the enactment of the new directive on the single digital market Secondly it analyzes the increasing significance of artificial intelligence in our daily life The book then addresses emerging issues in EU digital law exploring out of the box approaches in Internet law It also presents the last cyber criminality law trends offenses international instrument behaviors and discusses the evolution of personal data protection Lastly it evaluates the degree of consumer and corporate protection in the digital environment demonstrating that now more than ever EU Internet law is based on a combination of copyright civil administrative criminal commercial and banking laws

Coherence between Data Protection and Competition Law in Digital Markets Klaudia Majcher,2023-10-09 In digital markets data protection and competition law affect each other in diverse and intricate ways Their entanglement has triggered a global debate on how these two areas of law should interact to effectively address new harms and ensure that the digital economy flourishes Coherence between Data Protection and Competition Law in Digital Markets offers a blueprint for bridging the disconnect between data protection and competition law and ensuring a coherent approach towards their enforcement in digital markets Specifically this book focuses on the evolution of data protection and competition law their underlying rationale their key features and common objectives and provides a series of examples to demonstrate how the same empirical phenomena in digital markets pose a common challenge to protecting personal data and promoting market competitiveness A panoply of theoretical and empirical commonalities between these two fields of law as this volume shows

are barely mirrored in the legal enforcement policy and institutional approaches in the EU and beyond where the silo approach continues to prevail. The ideas that Majcher puts forward for a more synergetic integration of data protection and competition law are anchored in the concept of sectional coherence. This new coherence centred paradigm reimagines the interpretation and enforcement of data protection and competition law as mutually cognizant and reciprocal, allowing readers to explore in an innovative way the interface between these legal fields and identify positive interactions instead of merely addressing inconsistencies and tensions. This book reflects on the conceptual, practical, institutional and constitutional implications of the transition towards coherence and the relevance of its findings for other jurisdictions.

Regulatory Governance Abha Yadav, 2025-04-01. This book explores the role of regulatory bodies and their emergence as the fourth branch of governments. It brings together professionals, academicians and experts working in the regulatory sector to present a foundational text on the regulatory regime in India. From case studies to theoretical interventions, the book brings together a wide range of insights on an important but often neglected aspect of governance. It examines a range of themes including the need for regulatory policy in a post-Covid world, regulatory excellence, impact of regulatory assessments, regulation of hazard competition commissions, regulation of digital assets, stakeholder interests and investor activism and anti-trust laws. The volume will be of great interest to scholars and researchers of law and governance, public policy and South Asian studies.

Constitutions of Value Isabel Feichtner, Geoff Gordon, 2023-01-19. Gathering an interdisciplinary range of cutting edge scholars, this book addresses legal constitutions of value. Global value production and transnational value practices that rely on exploitation and extraction have left us with toxic commons and a damaged planet. Against this situation, the book examines law's fundamental role in institutions of value production and valuation. Utilizing pathbreaking theoretical approaches, it problematizes mainstream efforts to redeem institutions of value production by recoupling them with progressive values. Aiming beyond radical critique, the book opens up the possibility of imagining and enacting new and different value practices. This wide-ranging and accessible book will appeal to international lawyers, socio-legal scholars, those working at the intersections of law and economy and others in politics, economics, environmental studies and elsewhere who are concerned with rethinking our current ideas of what has value, what does not, and whether and how value may be revalued. Defining Identity and the Changing Scope of Culture in the Digital Age Novak, Alison, El-Burki, Imaani Jamillah, 2016-05-19. Since the popularization of Internet technologies in the mid-1990s, human identity and collective culture has been dramatically shaped by our continued use of digital communication platforms and engagement with the digital world. Despite a plethora of scholarship, questions remain regarding how these technologies impact personal identity and perceptions of global culture. *Defining Identity and the Changing Scope of Culture in the Digital Age* explores a multitude of topics pertaining to selfhood, self-expression, human

interaction and perceptions of civilization and culture in an age where technology has become integrated into every facet of our everyday lives Highlighting issues of race ethnicity and gender in digital culture interpersonal and computer mediated communication pop culture social media and the digitization of knowledge this pivotal reference publication is designed for use by scholars psychologists sociologists and graduate level students interested in the fluid and rapidly evolving norms of identity and culture through digital media Plantation and Agroforestry Pulpwood Value Chain Approach K.T. Parthiban,R. Seenivasan,2017-02-01 **Economic Policy, Crisis and Innovation** Maria Cristina Marcuzzo,Antonella Palumbo,Paola Villa,2019-11-21 This book is a Festschrift to Annamaria Simonazzi and embraces the themes that she has contributed to over the years through her insightful and inspiring works It brings together contributions from a number of distinguished European economists which pay tribute to her by engaging in a dialogue with her research simultaneously reflecting on the process of growing economic disintegration in the European Union its causes and its possible remedies The book shows the deep interrelations between macroeconomic issues and the social sphere and points to the need to rethink the very foundations of European economic policies as an effective antidote to growing imbalances and disintegration In particular the effects of austerity are assessed alongside the dimensions of inequality gender discrimination poverty and unemployment broadening the perspective also beyond the Eurozone The authors envision a progressive society in which investments in research and intelligent industrial policies govern the processes of technological change and drive the economy towards a more efficient and more equal model of development characterized by high productivity and high wages While some chapters deal directly with policy issues policy suggestions and proposals are scattered throughout the whole book This volume will appeal to academics economists and policy makers interested in understanding the policy response of European institutions to the challenges posed by both the Great Recession and subsequent developments in the European economies The book is written in an engaging and accessible way and the themes are broad enough to generate interest from the international public **The Handbook of Security** Martin Gill,2022-06-22 The substantially revised third edition of The Handbook of Security provides the most comprehensive analysis of scholarly security debates and issues to date It reflects the developments in security technology the convergence of the cyber and security worlds and the fact that security management has become even more business focused It covers newer topics like terrorism violence and cybercrime through various offence types such as commercial robbery and bribery This handbook comprises mostly brand new chapters and a few thoroughly revised chapters with discussions of the impact of the pandemic It includes contributions from some of the world's leading scholars from an even broader geographic scale to critique the way security is provided and managed It speaks to professionals working in security and students studying security related courses Chapter 5 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com *Converging Regions* Nele Lenze,Charlotte Schriwer,2016-05-13 For over a millennium Asia and the Middle East have been closely connected through maritime

activities and trade a flourishing relationship that has given rise to new and thriving societies across the Indian Ocean region and Arabia In recent times with the global political and economic power shifts of the past decade significant events in the Middle East and Asia have brought about fundamental global change the Arab uprisings the emergence of India and China as powerful global economies the growing strength of various new Islamic movements and serious financial uncertainties on a global scale have laid the foundations of a new world order between East and West The current volume examines this renewed global dynamic and how it is changing the relationships between the interdependent global communities across Asia and the Middle East Focussing on the broader aspects of finance and trade between the Middle East and Asia as well as growing security issues over natural resources and questions of sovereignty this volume concludes with speculations on the growing importance of Asia and the Middle East in the global setting

Handbook of Research on Global Business

Opportunities Christiansen, Bryan,2014-10-31 In the modern globalized economy it is important for businesses of all sizes to take advantage of the opportunity to enter diverse markets around the world Through an international presence organizations can remain competitive The Handbook of Research on Global Business Opportunities combines comprehensive viewpoints and research on various business enterprises from around the world in companies of all sizes and models discussing different aspects and concerns in the global business environment such as corruption taxation supply chain

management and economic impacts This handbook is an essential reference source for business executives from both large and small firms business scholars researchers academics students and professionals *The Economics of Protected Marine Species: Concepts in Research and Management* Kristy Wallmo,Kathryn Bisack,Daniel K. Lew,Dale E. Squires,2016-10-21 Protected marine species have populations that are depleted decreasing or are at risk of extinction or local extirpation As of 2015 The International Union for the Conservation of Nature a global environmental organization lists approximately 737 marine species worldwide that are considered at risk of extinction Many are provided legal protection through national laws requiring research and management measures aimed at recovering and maintaining the species at a sustainable population level Integral to the policy decision process involving the management and recovery of marine species is the consideration of trade offs between the economic and ecological costs and benefits of protection This suggests that economics at its core the study of trade offs has a significant role In the U S a somewhat traditional use of economics in protected species research and management has involved cost minimization or cost effectiveness analyses to help select or prioritize conservation actions Economic research has also provided estimates of public non market benefits of recovering species which can be used in larger management frameworks such as ecosystem based management and coastal and marine spatial planning Inherent in much of this research however are complex biological and ecological relationships in which varying degrees of scientific uncertainty are present Addressing this type of uncertainty can affect the economic outcomes related to protected species For example recent work suggests that increasing scientific precision in biological sampling and models can greatly

affect the magnitude of economic benefits to commercial fisheries while other research suggests that public non market benefits of species recovery are sensitive to uncertainty about baseline population estimates Previous research has illustrated the importance of understanding the biological ecological and economic aspects of protected species management and recovery In this research topic we synthesize current protected marine species economic research and expand the discussion on present and future challenges related to protected species economics The series of manuscripts brings together an array of prominent researchers and advances our understanding of the ecological and economic aspects of managing and recovering protected marine species
