*Yesterday, Today, and Tomorrow* Roslyn Arlin Mickelson,Stephen Samuel Smith,Amy Hawn Nelson,2017-11-14 Yesterday Today and Tomorrow provides a compelling analysis of the forces and choices that have shaped the trend toward the resegregation of public schools By assembling a wide range of contributors historians sociologists economists and education scholars the editors provide a comprehensive view of a community s experience with desegregation and economic development Here we see resegregation through the lens of Charlotte North Carolina once a national model of successful desegregation and home of the landmark Swann desegregation case which gave rise to school busing This book recounts the last forty years of Charlotte s desegregation and resegregation putting education reform in political and economic context Within a decade of the Swanncase the district had developed one of the nation s most successful desegregation plans measured by racial balance and improved academic outcomes for both black and white students However beginning in the 1990s this plan was gradually dismantled Today the level of resegregation in Charlotte has almost returned to what it was prior to 1971 At the core of Charlotte s story is the relationship between social structure and human agency with an emphasis on how yesterday s decisions and actions define today s choices

**Mapping Power** Navroz K. Dubash,2018-08-22 Electricity is critical to

enabling India's economic growth and providing a better future for its citizens. In spite of several decades of reform, the Indian electricity sector is unable to provide high quality and affordable electricity for all and grapples with the challenge of poor financial and operational performance. To understand why, Mapping Power provides the most comprehensive analysis of the political economy of electricity in India's states. With chapters on fifteen states by scholars of state politics and electricity, this volume maps the political and economic forces that constrain and shape decisions in electricity distribution. Contrary to conventional wisdom, it concludes that attempts to depoliticize the sector are misplaced and could worsen outcomes. Instead, it suggests that a historically grounded political economy analysis helps understand the past and devise reforms to simultaneously improve sectoral outcomes and generate political rewards. These arguments have implications for the challenges facing India's electricity future, including providing electricity to all, implementing government reform schemes, and successfully managing the rise of renewable energy.

India-United States Cooperation on Global Security is the summary of a workshop held by the U.S. National Academy of Sciences (NAS) together with its partner of more than 15 years, the National Institute for Advanced Studies (NIAS) in Bangalore, India. The workshop identified and examined potential areas for substantive scientific and technical cooperation between the two countries on issues related to nuclear material security.
