**The Education Invasion** Joy Pullmann,2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation s schools Who benefits And how can citizens regain local

self governance in education so their children s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies *Cognitive and Affective Aspects in Science Education Research* Kaisa Hahl,Kalle Juuti,Jarkko Lampiselkä,Anna Uitto,Jari Lavonen,2017-07-10 This edited volume brings forth intriguing novel and innovative research in the field of science education The chapters in the book deal with a wide variety of topics and research approaches conducted in various contexts and settings all adding a strong contribution to knowledge on science teaching and learning The book is comprised of selected high quality studies that were presented at the 11th European Science Education Research Association ESERA Conference held in Helsinki Finland from 31 August to 4 September 2015 The ESERA science education research community consists of professionals with diverse disciplinary backgrounds from natural sciences to social sciences This diversity provides a rich understanding of cognitive and affective aspects of science teaching and learning in this volume The studies in this book will invoke discussion and ignite further interest in finding new ways of doing and researching science education for the future and looking fo r international partners for both science education and science education research The twenty five chapters showcase current orientations of research in science education and are of interest to science teachers teacher educators and science education researchers around the world with a commitment to evidence based and forward looking science teaching and learning
