The assessment on a large scale of aspects of the educational system started in Italy when the Ministry imposed in 1999 that the teaching of each course of Bachelor and Master programmes be evaluated by the student and that synthetic marks be sent to a National Board for University System Evaluation CNVSU for comparative and intervention purposes. The compelling need to assess the course quality not only demolished the atavistic distrust that part of the academics have had against the assessment of the teaching but also started in a concrete way the participation of students to activities dedicated to them. Moreover the widespread consciousness of teaching assessment as a tool for empowering the higher education system entered the Ministry and universities agenda. Even though the use of the course evaluations for intervention purposes still is limited to the most fanciful and fearless faculties and universities the process has started and it will not be easy to circumvent.
