Soviet SCI_BERIA Ksenia Tatarchenko,2024-10-03 At first glance the Novosibirsk Scientific Center or Akademgorodok appears as an outlier in academic excellence This science city is renowned for a preeminent university dozens of research institutes and a thriving technopark At home it is an emblem of Russian innovation abroad it is often portrayed as a potential threat a breeding ground of cyber soldiers Though Siberia has been the main source of post 1991 Russian carbon revenues its soviet history and cold war legacy of internationalism demonstrates that territorial and scientific dimensions interlocked the moment the Siberian Branch of the Soviet Academy of Sciences was created in 1957 Drawing on a wide range of previously unexplored archives Soviet SCI_BERIA focuses on how the post Stalinist Siberia was redefined and represented through the ideal of rational development the late socialist innovation practices and the relationship between experts and the state It offers a fresh insight into the transition from Soviet to post Soviet Akademgorodok In doing so Tatarchenko not only fosters a conversation between history area studies and science studies but also sheds new light on Soviet modernity and the limits of its transformative projects **Origins and predictability of the intraseasonal to interannual variabilities of regional climate** Zhiwei Zhu,Pang-chi Hsu,Ruifen Zhan,Lei Zhang,Bin Yu,2023-01-13 *The administration of examinations for 15-19 year olds in England* Great Britain: Parliament: House of Commons: Education Committee,2012-07-03 This report from the Education Committee looks at the administration of examinations for 15 19 year olds in England The

Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content. Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated. The Committee considers a number of options to change incentives including i A single board This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii Franchising of subjects to exam boards This removes syllabus competition but again has downsides 3 Or the current system of multiple boards The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges The Committee also recommends the development of national syllabuses accredited by Ofqual The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate
