

Geomorphology: Grade 11 Geography Summary

Geomorphology is the study of landforms, their processes, forms, and the landscapes they create. It involves understanding how natural forces shape the Earth's surface and change it over time.

1. Internal and External Earth Processes

- **Internal Processes (Endogenic Forces)**: These originate from within the Earth and shape landforms through tectonic activities.
 - **Tectonic Movements**: Include earthquakes, volcanic activity, and mountain building.
 - **Folding and Faulting**: Caused by tectonic forces; folding creates ridges and valleys, while faulting leads to fractures and displacement of rock layers.
- **External Processes (Exogenic Forces)**: Involve weathering, erosion, and deposition, driven by forces like water, wind, ice, and gravity.
 - **Weathering**: The breakdown of rocks at the Earth's surface into smaller particles, which can be physical, chemical, or biological.
 - **Erosion and Deposition**: Erosion transports weathered materials, while deposition occurs when these materials settle and accumulate.

2. Types of Landforms

- **Mountains**: Created by tectonic forces like folding, faulting, and volcanic activity.
- **Plateaus**: Elevated flat areas formed by uplift or lava flow.
- **Plains**: Large, flat areas resulting from sediment deposition over time.

J. Davies,2007 We are poised to embark on a new era of discovery in the study of geomorphology The discipline has a long and illustrious history but in recent years an entirely new way of studying landscapes and seascapes has been developed It involves the use of 3D seismic data Just as CAT scans allow medical staff to view our anatomy in 3D seismic data now allows Earth scientists to do what the early geomorphologists could only dream of view tens and hundreds of square kilometres of the Earth s subsurface in 3D and therefore see for the first time how landscapes have evolved through time This volume

demonstrates how Earth scientists are starting to use this relatively new tool to study the dynamic evolution of a range of sedimentary environments **Films and Other Materials for Projection** Library of Congress,1978 Dictionary Catalog of the Slavonic Collection New York Public Library.
