TO INVESTIGATE THE PROCESS OF MEIOSIS

Organisms produced by sexual reproduction are truly new organisms. They have different sets of genes from their parents. The gametes formed by meiosis are just for the purpose of sexual reproduction. Gametes cannot grow into another organism until they fuse with another gamete to form a zygote. When the zygote forms, it is genetically unique.

Genetic variation allows a species to have a better chance of adapting to and surviving sudden changes in the environment. No two individuals in a sexually reproducing population are exactly the same. Meiosis during sexual reproduction therefore ensures maximum genetic variation and improved the chances of a species' survival.

Linking Competence to Opportunities to Learn Xiufeng Liu,2009-05-01 For many people a high standard for student learning is desirable This is what underlies current standard based science education reforms around the world As someone who was born and brought up in a less privileged home and educated in a resource limited school environment in a developing country I always had to study hard to meet various standards from elementary to high school to university My first book in English published over 10 years ago Liu X 1996 Mathematics and Science Curriculum Change in the People's Republic of China Lewiston NY The Edwin Mellen Press provided me an opportunity to examine standards in Chinese national science teaching syllabi from a historical and political point of view I argued that standards are developed for particular political agendas in order to maintain the privileged position of certain groups in urban residents in a society at expenses of others in rural residents Thus underneath standards is systematic discrimination and injustice Since then I have had opportunities to study the issue of standards in much more breadth and depth This book Linking Competence to Opportunities to Learn Models of Competence and data mining provides me an opportunity to examine standards from a different perspective opportunity to learn *The NAEP ...
