Development, Education and Learning in Sri Lanka Angela W. Little, 2024-06-13 Sri Lanka's early achievements in education and literacy became well known among the international development community in the middle of the last century and were often used to benchmark progress elsewhere *Development Education and Learning in Sri Lanka* presents an illuminating narrative of changing education fortunes and inequalities based on half a century of research This research journey was undertaken in collaboration with Sri Lankan researchers island wide in myriad communities schools classrooms and education offices through conversations with countless parents teachers students community members trade union officers politicians and members of local national and international development agencies as well as through extensive documentary analysis The book delineates the distinctive and changing features of the Sri Lankan education system through

comparisons with systems elsewhere through an understanding of national political economic and social conditions crises and upheavals through changes in education policy and through shifting patterns of opportunity among diverse social groups These analyses are framed by themes in the international development discourse ranging from modernisation to basic needs to globalisation and sustainable development some of which themes have been influenced by the Sri Lankan story The book's overriding messages are the need to understand education and development in a country's own terms and to place learning at the heart of education policy situating it within broader conceptions of the purpose values and means of development

Globalisation, Employment and Education in Sri Lanka Angela W. Little, Siri T. Hettige, 2014-05-23 Since the late 1970s Sri Lanka has undergone a socio economic transformation from protectionism towards economic liberalisation and increasing integration into the world economy Through a systematic comparison of these periods of economic change 1956 1977 and 1977 to the present Angela W Little and Siri T Hettige examine the impact of this transformation on education youth employment and equality of opportunity in Sri Lanka The book charts Sri Lanka's shift from a predominantly agricultural economy to one dominated by services and manufacturing a reduction in unemployment rising educational and occupational levels expectations and achievements and a reduction in poverty In turn it reveals a growing role for the private sector and foreign interests in post secondary education and a modest growth in private education at the primary and secondary levels as well as widening social disparities in access to qualifications training and

skills The Sri Lankan experience of and engagement with globalisation has been tempered by a long running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war Now that the war is won the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups This challenge requires serious policy analysis the generation of more state revenues the reallocation of existing public resources and a political commitment to the winning of a sustainable peace and stability This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice and to the interaction of exogenous and endogenous forces for educational change It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy As such it has a wide interdisciplinary appeal across education policy and politics Asian education South Asian society youth policy sociology of education political economy of social change and globalisation
