**The Future of Liquefied Natural Gas in a Decarbonising World** Omran

Al-Kuwari, 2024-12-31 This book analyses the role of liquefied natural gas in a decarbonising world and presents the most significant energy transition options and implications for the liquefied natural gas industry. Major investments and developments in technology have been made in recent years in an attempt to meet global demand but energy systems require radical new pathways to meet climate goals in line with the Paris Agreement. This book explores the role of liquefied natural gas in the context of the global energy transition, arguing that liquefied natural gas has a role to play in terms of resources, the gas market, energy transition dynamics, regime status and geopolitical powers. Using a bespoke meta-framework grounded in institutional theory and case studies, the book examines how institutional, political and resource characteristics affect liquefied natural gas use. The book also explores implications for liquefied natural gas exporters in the context of the energy transition and analyses the characteristics of liquefied natural gas compared with pipeline gas. The multiple case study approach examines the role of natural gas in Japan, the UK and China, three countries in different stages of the energy transition, to determine potential pathways for exporters. Utilising a multi-method procedure for data collection, including data analysis in depth, interviews and direct observations, the book concludes with findings on the potential role of liquefied natural gas in various future stages of the energy transition. Written by an industry expert, this book will be of value to students, researchers and academics interested in energy studies, decarbonisation studies and environmental studies more broadly. The

*Failure. Russia Under Putin* Harley D. Balzer, Steven A. Fisher, 2025-07-10 Examines the significant failures Russia has faced under Vladimir Putin's leadership and presents an important counterpoint to a broad range of studies emphasizing Russia's resurrection status as a persistent power or successful military reform Despite Putin's claims of restoring Russia's rightful place in the world reviving the economic and industrial capacity destroyed in the 1990s and improving living standards data show that the gains from the oil price bonanza of 2000-2008 have long since vanished The success Putin has achieved in centralizing power and repressing opposition now prevents any effective changes to address Russia's long term decline Failures include the inability to diversify the economy reduce corruption reverse demographic and educational decline alleviate poverty or address social inequalities This edited volume examines how Putin's policy choices have led to Russia's inexorable decline on the global stage Depicting Russia's inability under Vladimir Putin's rule to improve critical spheres of
