NIDA Research Monograph ,1976 *The Developmental Psychology of Planning* Sarah L. Friedman,Ellin Kofsky Scholnick,2014-02-25 Planning is defined as formulating an organized method for action in advance Although people do not plan all the time and planning does not occur in every situation planning skill is central to all human behavior There are developmental differences in planning skill and in the motivation to plan Even among adults variations in the engagement in the planning process are affected by individual attitudes beliefs and goals Planning also has a different meaning at various

junctures in one's life Yet despite the amount of research on planning many of the studies have focused only on the cognitive processes that enable mature individuals to plan A continued exploration of the developmental course of planning this text attempts to situate cognitive aspects of planning in the context of the social and cultural environment and other psychological processes Bringing together the contributions of developmental organizational and social psychologists it explains how when and why we plan Finally it addresses various issues that pertain to the different aspects of planning from formal problem solving to handling the demands of everyday life

Cultures, Communities, Competence, and Change Forrest B. Tyler, 2013-04-17 Cultures Communities Competence and Change provides a transcultural psychosocial conception of the nature of individual and social activity The author presents an integrated view of how people develop a psychosocially based awareness of themselves and their milieus to shape what he refers to as their interrelated social systems In so doing he challenges current deficit prevention emphases in the helping disciplines and promotes a constructive prosocial model of individual and social approaches to change

Attitudes, Personality And Behaviour Ajzen, I, 2005-11-01 I denne reviderede udgave beskrives den seneste udvikling indenfor personlighedsforskning og tests af personlighed og adfærd Bogen giver indsigt i hvorledes man ved hjælp af teorier om personlighed kan forklare og forudsige menneskelig adfærd og hvilke implikationer dette kan have

Advances in Psychology Research Alexandra Columbus, 2006 Advances in Psychology Research presents original research results on the leading edge of psychology Each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum

Health Behavior Sonya Bahar, 2013-11-11 HEALTH BEHAVIOR AS BASIC RESEARCH Health behavior is not a traditional discipline but a newly emerging interdisciplinary field It is still in the process of establishing its identity Few institutional or organizational structures i.e. departments and programs reflect it and few books and journals are directed at it The primary objective of this book is thus to identify and establish health behavior as an important area of basic research worthy of being studied in its own right As a basic research area health behavior transcends commitment to a particular behavior a specific illness or health problem or a single set of determinants One way of achieving this objective is to look at health behavior as an outcome of a range of personal and social determinants rather than as a set of risk factors or as targets for intervention strategies directed at behavioral change The book is thus organized primarily in terms of the size of the determinants of concern rather than in terms of specific health behaviors or specific health problems or conditions With the first part of the book establishing working definitions of health behavior and health behavior research as basic frameworks the second part moves from smaller to larger systems informing the reader about basic research that demonstrates how health behavior is determined by personal family social institutional and cultural factors These distinctions reflect some arbitrariness the family organizations and institutions for example are social units
