User Manual "Installer Creation Using Inno Setup"

Introduction

This article will focus on Inno Setup – a convenient tool intended to package applications for Windows OS.

Why Inno Setup? "Inno Setup today rivals and even surpasses many commercial installers in feature set and stability," its developers official website says. Indeed, this tool is quite simple to learn and powerful in terms of its capabilities.

At the moment Inno Setup developers mention the following features as key ones:

- support for all versions of Windows starting from Windows 2000;
- 64-bit and 32-bit installation support;
- built-in Pascal script processor for more flexible customization;
- possibility to pack the application and all the files that are needed for its operation into one compact .exe file;
- Inno Setup supports several data compression modes. If necessary, built-in compression can be disabled and third-party archivers can be used;
- it allows adding registry keys during installation, launching additional applications during, before and after installation;
- possibility to delete registry keys and all traces of program activity, flexibly configure the uninstaller.
