[Uncertain](#) Eduardo Gil, Eva Gil, Juan Gil, María Ángeles Gil, 2018-02-28 This book is a tribute to Professor Pedro Gil who created the Department of Statistics OR and TM at the University of Oviedo and a former President of the Spanish Society of Statistics and OR SEIO In more than eighty original contributions it illustrates the extent to which Mathematics can help manage uncertainty a factor that is inherent to real life Today it goes without saying that in order to model experiments and systems and to analyze related outcomes and data it is necessary to consider formal ideas and develop scientific approaches and techniques for dealing with uncertainty Mathematics is crucial in this endeavor as this book demonstrates As Professor Pedro Gil highlighted twenty years ago there are several well known mathematical branches for this purpose including Mathematics of chance Probability and Statistics Mathematics of communication Information Theory and Mathematics of imprecision Fuzzy Sets Theory and others These branches often intertwine since different sources of uncertainty can coexist and they are not exhaustive While most of the papers presented here address the three aforementioned fields some hail from other Mathematical disciplines such as Operations Research others in turn put the spotlight on real world studies and applications The intended audience of this book is mainly statisticians mathematicians and computer scientists but practitioners in these areas will certainly also find the book a very interesting read [Cambridge IGCSE® and O Level](#)

[Additional Mathematics Coursebook](#) Sue Pemberton, 2018-02-22 These resources have been created for the Cambridge IGCSE and O Level Additional Mathematics syllabuses 0606 4037 for first examination from 2020 This coursebook gives clear explanations of new mathematical concepts followed by exercises This allows students to practise the skills required and gain the confidence to apply them Classroom discussion exercises and extra challenge questions have been designed to deepen students understanding and stimulate interest in Mathematics Answers to coursebook questions are in the back of the book **SPECIAL FUNCTIONS AND COMPLEX VARIABLES (ENGINEERING MATHEMATICS III)** BATHUL,

SHAHNAZ, 2017-07-07 This thoroughly revised book now in its third edition continues to discuss two important topics special functions and complex variables Chapters have been rearranged keeping in view the current syllabi of the universities The book analyzes special functions Legendre's equation and function and Bessel's function It explains how to solve Cauchy equations differential equation with variable coefficients and Frobenius of solving differential equation at a regular singular

point Besides the text also explains the notions of limit continuity and differentiability by giving a thorough grounding on analytic functions and their relations with harmonic functions In addition the book introduces the exponential function of a complex variable and with the help of this function defines trigonometric and hyperbolic functions and explains their properties While discussing different mathematical concepts the book discusses a number of theorems such as Cauchy's integral theorem for the integration of a complex variable Taylor's theorem for the analysis of complex power series the residue theorem for evaluation of residues the argument principle and Rouché's theorem for the determination of the number of zeroes of complex polynomials Finally the book gives a thorough exposition of conformal mappings and develops the theory of bilinear transformation Intended as a textbook for engineering students this book will also be useful for undergraduate and postgraduate students of mathematics

NEW TO THE THIRD EDITION Includes a new chapter on Linear Ordinary Differential Equations with Variable Coefficients and Series Solutions Incorporates Short Questions and Answers to help students to prepare for examinations Provides several worked out problems and previous years questions and also includes more MCQs and exercises in each chapter
