*Accounting, Organizations, and Institutions* Christopher S. Chapman,David J. Cooper,Peter Miller,2009-08-13 Accounting has an ever increasing significance in contemporary society Indeed some argue that its practices are fundamental to the development and functioning of modern capitalist societies We can see accounting everywhere in organizations where budgeting investing costing and performance appraisal rely on accounting practices in financial and other audits in corporate scandals and financial reporting and regulation in corporate governance risk management and accountability and in the corresponding growth and influence of the accounting profession Accounting too is an important part of the curriculum and research of business and management schools the fastest growing sector in higher education This growth is largely a phenomenon of the last 50 years or so Prior to that accounting was seen mainly as a mundane technical bookkeeping exercise and some still share that naive view The growth in accounting has demanded a corresponding engagement by

Wilson, 2013-09-13 When marketing managers and financial managers join forces within any business the result can often be poor communication on financial criteria and goals The risk of this situation occurring is inevitably present when those with different professional backgrounds and roles are working in accordance with their own norms In his seminal 1956 paper on general systems theory the economist Kenneth Boulding referred to the phenomenon of specialised ears and generalised deafness which can be seen to exist when marketing managers are financially illiterate or when financial managers lack the necessary insights to design implement and operate accounting systems which are useful to marketing managers in carrying out their roles It is increasingly difficult to attach credence to the idea of marketing managers who lack financial skills or financial managers who fail to relate to the context in which marketing managers operate Understanding the marketing accounting interface is therefore important in generating emergent properties from the interaction of marketers and accountants whereby the whole is greater than the sum of the parts The chapters in this volume seek to address this challenge This book was originally published as a special issue of the Journal of Marketing Management
