Babin, Marko Sarstedt, 2019-03-18 This commemorative volume honors the contributions of Prof Joseph F Hair Jr who through his writings leadership and mentoring has had a profound influence on marketing and other fields of business research He is widely known for sidestepping mathematically complex ways of teaching statistical approaches with an eye toward making the tools accessible to the average behavioral researcher Joe is also a bona fide researcher whose work has had a massive impact on marketing and business research in general The book provides revealing insights on his works and acknowledges his role as an outstanding teacher and mentor who has shaped generations of researchers **The Strategy of Global Branding and Brand Equity** Alvin Lee, Jinchao Yang, Richard Mizerski, Claire Lambert, 2015-03-02 Why does a customer choose one brand over another What are the factors which would make an individual more inclined to choose your brand This book offers a way to predict which brand a buyer will purchase It looks at brand performance within a product category and tests it in different countries with very different cultures Following the Predictive Brand Choice PBC

model this book seeks to predict a consumer's loyalty and choice. Results have shown that PBC can achieve a high level of predictive accuracy in excess of 70% in mature markets. This accuracy holds even in the face of price competition from a less preferred brand. PBC uses a prospective predicting method which does not have to rely on a brand's past performance or a customer's purchase history for prediction. Choice data is gathered in the retail setting at the point of sale. The Strategy of Global Branding and Brand Equity presents survey data and quantitative analyses that prove the method described to be practical, useful, and implementable for both researchers and practitioners of commercial brand strategies.
