the children's musical style and interactively reflects it in its responses. The book describes the potential of these applications to enhance children's agency and musical identity by reflecting players' musical inputs, storing and creating variations on them. Set in the broader context of current music education research, it addresses the benefits and challenges of incorporating music technologies in primary and pre-school education. It is comprised of six main chapters which cover the creation of children's own music and their musical selves, critical thinking skills and learner agency, musical language development and emotional intent during creative music making. The authors provide a range of straightforward techniques and strategies which challenge conceptions of difficult-to-use music technologies in formal music education. These are supported by an informative collection of practitioner vignettes written by teachers who have used the software in their classrooms. Not only are the teachers' voices heard here but also those of children as they discover some of the creative possibilities of music making. The book also provides free access to a companion website with teacher forums and a large bank of activities to explore. A toolkit serves as a database of the teaching activities in which MIROR applications have been used and provides a set of useful ideas regarding its future use in a variety of settings. This book demonstrates that music applications based on artificial intelligence techniques can make an important contribution to music education within primary and pre-school education. It will be of key interest to academics, researchers and postgraduate students in the fields of music education, music technology, early years and primary education, teaching and learning, and teacher education. It will also serve as an important point of reference for Early Years and Primary practitioners.

Education John Finney, Felicity Laurence, 2013-02-28 MasterClass in Music Education provides vivid, topical, reflective and above all, real accounts from existing teachers researching in the field, together with theoretical insights and a guided view of the relevant existing literature. At the same time, they will be able to develop an understanding of how to carry out research from the real-life case study accounts written by their peers. John Finney and Felicity Laurence provide overarching support, drawing on their own experiences as supervisors of MA Music Education students to frame the debates and reflections which arise.

Policy and

the Political Life of Music Education Patrick Schmidt, Richard Colwell, 2017-02-01 Policy and the Political Life of Music Education is the first book of its kind in the field of Music Education. It offers a far-reaching and innovative outlook, bringing together expert voices who provide a multifaceted and global set of insights into a critical arena for action today: policy. On one hand, the book helps the novice to make sense of what policy is, how it functions, and how it is discussed in various parts of the world, while on the other, it offers the experienced educator a set of critically written analyses that outline the state of the play of music education policy thinking. As policy participation remains largely underexplored in music education, the book helps to clarify to teachers how policy thinking does shape educational action and directly influences the nature, extent

and impact of our programs The goal is to help readers understand the complexities of policy and to become better skilled in how to think speak and act in policy terms The book provides new ways to understand and therefore imagine policy approximating it to the lives of educators and highlighting its importance and impact This is an essential read for anyone interested in change and how to better understand decision making within music and education Finally this book while aimed at the growth of music educators knowledge base regarding policy also fosters open thinking regarding policy as subject helping educators straddling arts and education to recognize that policy thinking can offer creative designs for educational change
