Geography Grade Paper 2014 December Memo:

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

The Rights of Women Erika Bachiochi, 2021-07-15 Erika Bachiochi offers an original look at the development of feminism in the United States advancing a vision of rights that rests upon our responsibilities to others In *The Rights of Women* Erika Bachiochi explores the development of feminist thought in the United States Inspired by the writings of Mary Wollstonecraft Bachiochi presents the intellectual history of a lost vision of women s rights seamlessly weaving philosophical insight biographical portraits and constitutional law to showcase the once predominant view that our rights properly rest upon our concrete responsibilities to God self family and community Bachiochi proposes a philosophical and legal framework for rights that builds on the communitarian tradition of feminist thought as seen in the work of Elizabeth Fox Genovese and Jean Bethke Elshtain Drawing on the insight of prominent figures such as Sarah Grimk Frances Willard Florence Kelley Betty Friedan Pauli

Murray Ruth Bader Ginsburg and Mary Ann Glendon this book is unique in its treatment of the moral roots of women's rights in America and its critique of the movement's current trajectory *The Rights of Women* provides a synthesis of ancient wisdom and modern political insight that locates the family's vital work at the very center of personal and political self government Bachiochi demonstrates that when rights are properly understood as a civil and political apparatus born of the natural duties we owe to one another they make more visible our personal responsibilities and more viable our common life together This smart and sophisticated application of Wollstonecraft's thought will serve as a guide for how we might better value the culturally essential work of the home and thereby promote authentic personal and political freedom *The Rights of Women* will interest students and scholars of political theory gender and women's studies constitutional law and all readers interested in women's rights

Taken For A Ride Matteo Rizzo, 2017-05-19 How does public transport work in an African city under neoliberalism Who owns what in it Who has the power to influence its shape and changes in it over time What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in Dar es Salaam These are the main questions that inform this in depth case study of Dar es Salaam's public transport system over more than forty years The growth of cities and informal economies are two central manifestations of globalization in the developing world *Taken for a Ride* addresses both drawing on long term fieldwork in Dar es Salaam Tanzania and charting its public transport system's journey from public to private provision This new addition to the Critical Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights A longitudinal study of workers throws light on patterns of occupational mobility in the sector and the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it are analysed *Taken for a Ride* reveals the political economy of public transport exposing the limitations of market fundamentalist and post colonial scholarship on economic informality the urban experience in developing countries and the failure to locate the agency of the urban poor within their economic and political structures It is both a contribution and a call for the contextualised study of actually existing neoliberalism

The Geography of Injustice Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory

concerning Japan's imperial aims across the region. The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption. The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war, East Asia is more divided than united by history. *Congressional Record* United States. Congress, 2017-10-24. *From Head Shops to Whole Foods* Joshua C. Davis, 2017-08-08. In the 1960s and 70s a diverse range of storefronts including head shops, African American bookstores, feminist businesses, and organic grocers brought the work of the New Left, Black Power, feminism, environmentalism, and other movements into the marketplace. Through shared ownership, limited growth, and democratic workplaces, these activist entrepreneurs offered alternatives to conventional profit-driven corporate business models. By the middle of the 1970s, thousands of these enterprises operated across the United States, but only a handful survive today. Some, such as Whole Foods Market, have abandoned their quest for collective political change in favor of maximizing profits. Vividly portraying the struggles, successes, and sacrifices of these unlikely entrepreneurs, *From Head Shops to Whole Foods* writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered. The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace. Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption, social enterprise, buying local, and mission-driven business, while also showing how today's companies have adopted the language but not often the mission of liberation and social change. **One Nation Undecided** Peter H. Schuck, 2019-08-06. At a time of deep social and political division, along comes a much-needed book to steer us toward solutions to five very difficult national problems. There could be no better guide for this endeavor than Peter Schuck, one of the clearest and most thoughtful legal and policy scholars of this or any generation. Robert E. Litan, author of *Trillion Dollar Economists*.

Horses, Power and Place Neil Ward, 2023-12-05. *Horses, Power and Place* explores the evolution of humanity's relationship with horses from early domestication through to the use of the horse as a draught animal, an agricultural, industrial, and military asset, and an animal of sport and leisure. Taking an historical approach and using Britain as a case study, this is the first book-length exploration of the horse in the more-than-human geography of a nation. It traces the role and implications of horse-based mobility for the evolution of settlement structure, urban morphology, and the rural landscape. It maps the growth and various uses of horses to the point of peak horse in the early twentieth century, before considering the contemporary place of the horse in twenty-first-century economy and society. It assesses the role of the horse in the formation of places within Britain and in the formation of the nation. The book reflects on the implications of this historical and contemporary equine geography for animal geographies and animal studies. It argues for the study of animals in general in how places are made, not just by humans. Written in a clear and accessible style, this book will be essential reading for students and scholars of animal geography and animal studies more widely. Social Reproduction and the City Simon Black, 2020 The transformation of child care after welfare reform in New York City and the struggle against that transformation is a largely untold story In the decade following welfare reform despite increases in child care funding there was little growth in New York's unionized center based child care system and no attempt to make this system more responsive to the needs of working mothers As the city delivered child care services on the cheap relying on non union home child care providers welfare rights organizations community legal clinics child care advocates low income community groups activist mothers and labor unions organized to demand fair solutions to the child care crisis that addressed poor single mothers need for quality affordable child care as well as child care providers need for decent work and pay Social Reproduction and the City tells this story linking welfare reform to feminist research and activism around the crisis of care social reproduction and the neoliberal city At a theoretical level Simon Black's history of this era presents a feminist political economy of the urban welfare regime applying a social reproduction lens to processes of urban neoliberalization and an urban lens to feminist analyses of welfare state restructuring and resistance Feminist political economy and feminist welfare state scholarship have not focused on the urban as a scale of analysis and critical approaches to urban neoliberalism often fail to address questions of social reproduction To address these unexplored areas Black unpacks the urban as a contested site of welfare state restructuring and examines the escalating crisis in social reproduction He lays bare the aftermath of the welfare to work agenda of the Giuliani administration in New York City on child care and the resistance to policies that deepened race class and gender inequities

An Endogenous Theory of Property Rights Peter Ho, 2018-10-15 From a neo liberal neo classical paradigm secure formal and private property rights are crucial to fostering sustained development Institutions that fail to respond to shifting socio economic opportunities are thus forced to make new arrangements The enigma is posed by developments on the ground Why would the removal of authoritarian institutions during the Arab Spring or Iraq War not increase market efficiency but rather cause the reverse while China and India despite persisting insecure informal and common institutions featured sustained growth This collection posits that

understanding these paradoxes requires a refocusing from form to function detached from normative assumptions about institutional appearance In so doing three things are accomplished First starting from case studies on land it is ascertained that the argument can be meaningfully extended to labour capital and beyond Second the argument validates the Credibility Thesis that is once institutions persist they fulfil a function Third the collection studies development broadly construed by including the modes of production and beyond the rural and urban the developed and developing This is why it reviews property rights from China and India to Turkey Mexico and Malaysia covering issues such as customary rights and privatization mining and pastoralism dam building and irrigation but also state owned banks trade unions and notaries This book was originally published as a special issue of The Journal of Peasant Studies Empire's Labor Adam D. Moore,2019-11-15 In a dramatic unveiling of the little known world of contracted military logistics Adam Moore examines the lives of the global army of laborers who support US overseas wars Empire's Labor brings us the experience of the hundreds of thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa He highlights the changes the US military has undergone since the Vietnam War when the ratio of contractors to uniformed personnel was roughly 1 6 In Afghanistan it has been as high as 4 1 This growth in logistics contracting represents a fundamental change in how the US fights wars with the military now dependent on a huge pool of contractors recruited from around the world It also Moore demonstrates has social economic and political implications that extend well beyond the battlefields Focusing on workers from the Philippines and Bosnia two major sources of third country national TCN military labor Moore explains the rise of large scale logistics outsourcing since the end of the Cold War describes the networks infrastructures and practices that span the spaces through which people information and goods circulate and reveals the experiences of foreign workers from the hidden dynamics of labor activism on bases to the economic and social impacts these jobs have on their families and the communities they hail from Through his extensive fieldwork and interviews Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military Thanks to generous funding from UCLA and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories **Excluded** Richard D Kahlenberg,2023-07-11 An indictment of America's housing policy that reveals the social engineering underlying our segregation by economic class the social and political fallout that result and what we can do about it The last acceptable form of prejudice in America is based on class and executed through state sponsored economic discrimination which is hard to see because it is much more subtle than raw racism While the American meritocracy officially denounces prejudice based on race and gender it has spawned a new form of bias against those with less education and income Millions of working class Americans have their opportunity blocked by exclusionary snob zoning These government policies make housing unaffordable frustrate the goals of the civil rights movement and lock

in inequality in our urban and suburban landscapes Through moving accounts of families excluded from economic and social opportunity as they are hemmed in through new redlining that limits the type of housing that can be built Richard Kahlenberg vividly illustrates why America has a housing crisis He also illustrates why economic segregation matters since where you live affects access to transportation employment opportunities decent health care and good schools He shows that housing choice has been socially engineered to the benefit of the affluent and that astonishingly the most restrictive zoning is found in politically liberal cities where racial views are more progressive Despite this there is hope Kahlenberg tells the inspiring stories of growing number of local and national movements working to tear down the walls that inflicts so much damage on the lives of millions of Americans
