**Big Data Applications in Geography and Planning** Mark Birkin, Graham Clarke, Jonathan Corcoran, Robert Stimson, 2021-05-28 This unique book demonstrates the utility of big data approaches in human geography and planning. Offering a carefully curated selection of case studies, it reveals how researchers are accessing big data, what this data looks like, and how such data can offer new and important insights and knowledge. Decolonization and Conflict Martin Thomas, Gareth Curless, 2017-06-15 Insurgency-based irregular warfare typifies armed conflict in the post-Cold War age. For some years now, western and other governments have struggled to contend with ideologically driven guerrilla movements, religiously inspired militias, and systematic targeting of civilian populations. Numerous conflicts of this type are rooted in experiences of empire breakdown. Yet few multi-empire studies of decolonisation's violence exist. Decolonization and Conflict brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe's empires after 1945. The contributors analyse multiple forms of colonial counter-insurgency, from the military engagement of anti-colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare. Contributors to the collection also show how insurgencies, their propaganda, and methods of action were inherently transnational and inter-connected. The resulting study is a vital contribution to our understanding of contested decolonization. It emphasises the global connections at work and reveals the contemporary resonances of both anti-colonial insurgencies and the means devised to counter them. It is essential reading for students and scholars of empire, decolonization, and asymmetric warfare. **America's Moment: Creating Opportunity in the Connected Age** Rework America, 2015-06-15 It is time for a new conversation. Amid the biggest economic transformation in a century, the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life. Yet today's economic arguments seem stuck. We need a new vision of a hopeful future and a new action agenda. So many Americans are uncertain about the future. How can there be so many paths to opportunity with so few people traveling them? As a nation, we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next. We have been here before. A hundred years ago, America experienced the greatest economic transformation and technological revolution in its history. The transformation of the past twenty years, as the world has moved through the information era into the digital age, has turned our life and work upside down once again. It is a time of tremendous change but also of tremendous possibility. Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions. In America's Moment, they suggest a practical agenda for an exciting future. It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities, preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world, using technology to match employers and workers, and transitioning to a no-collar working

world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country America's Moment is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone      *Dictators Without Borders* Alexander A. Cooley, John Heathershaw, 2017-02-07 A penetrating look into the unrecognized and unregulated links between autocratic regimes in Central Asia and centers of power and wealth throughout the West Weak corrupt and politically unstable the former Soviet republics of Kazakhstan Kyrgyzstan Tajikistan and Uzbekistan are dismissed as isolated and irrelevant to the outside world But are they This hard hitting book argues that Central Asia is in reality a globalization leader with extensive involvement in economics politics and security dynamics beyond its borders Yet Central Asia's international activities are mostly hidden from view with disturbing implications for world security Based on years of research and involvement in the region Alexander Cooley and John Heathershaw reveal how business networks elite bank accounts overseas courts third party brokers and Western lawyers connect Central Asia's supposedly isolated leaders with global power centers The authors also uncover widespread Western participation in money laundering bribery foreign lobbying by autocratic governments and the exploiting of legal loopholes within Central Asia Riveting and important this book exposes the global connections of a troubled region that must no longer be ignored      **Broadcasting Buildings** Shundana Yusaf, 2014-02-28 How the BBC shaped popular perceptions of architecture and placed them at the heart of debates over participatory democracy

Caucasus the Zagros and South Asia The 13 chapters in this volume highlight the distinct nature of the cultural occurrences during the Middle and Upper Paleolithic periods of the Levant displaying a continuous development as well as a combination of lithic traditions that may have originated in different regions This syncretism which is an unusual occurrence in the regions discussed in this volume reinforces the importance of the Levant as a region for interpreting the RNMH phenomenon in West Asia

**Defence Planning and Uncertainty** Stephan Frühling,2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty It draws on case studies from the United States Australian and New Zealand each of which developed key concepts for their particular circumstances and risk perception in Asia Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future

*The Center Cannot Hold* Jenna N. Hanchey,2023-07-07 In *The Center Cannot Hold* Jenna N Hanchey examines the decolonial potential emerging from processes of ruination and collapse Drawing on ethnographic fieldwork in rural Tanzania at an internationally funded NGO as it underwent dissolution Hanchey traces the conflicts between local leadership and Western paternalism as well as the unstable subjectivity of Western volunteers including the author who are unable to withstand the contradictions of playing

the dual roles of decolonializing ally and white savior She argues that Western institutional and mental structures must be allowed to fall apart to make possible the emergence of decolonial justice Hanchey shows how through ruination privileged subjects come to critical awareness through repeated encounters with their own complicity providing an opportunity to delink from and oppose epistemologies of coloniality After things fall apart Hanchey posits the creation of decolonial futures depends on the labor required to imagine impossible futures into being

**A Comparative Political Ecology of Exurbia** Laura E. Taylor, Patrick T. Hurley, 2016-05-26 This book is about politics and planning outside of cities where urban political economy and planning theories do not account for the resilience of places that are no longer rural and where local communities work hard to keep from ever becoming urban By examining exurbia as a type of place that is no

longer simply rural or only tied to the economies of global resources e g mining forestry and agriculture we explore how changing landscapes are planned and designed not to be urban that is to look function and feel different from cities and suburbs in spite of new home development and real estate speculation The book s authors contend that exurbia is defined by the persistence of rural economies the conservation of rural character and protection of natural ecological systems all of which are critical components of the contentious local politics that seek to limit growth Comparative political ecology is used as an organizing concept throughout the book to describe the nature of exurban areas in the U S and Australia although exurbs are common to many countries The essays each describe distinctive case studies with each chapter using the key concepts of competing rural capitalisms and uneven environmental management to describe the politics of exurban change This systematic analysis makes the processes of exurban change easier to see and understand Based on these case studies seven characteristics of exurban places are identified rural character access local economic change ideologies of nature changes in land management coalition building and land use planning This book will be of interest to those who study planning conservation and land development issues especially in areas of high natural amenity or environmental value There is no political ecology book quite like this neither one solely focused on cases from the developed world in this case the United States and Australia nor one that specifically harnesses different case studies from multiple areas to develop a central organizing perspective of landscape change

**Sand, Snow, and Stardust** Gretchen Heefner, 2025-05-05 A vivid tour of US military efforts to understand survive and command harsh environments worldwide and beyond Deserts the Arctic outer space these extreme environments are often seen as inhospitable places at the edges of our maps But from the 1940s through the 1960s spurred by the diverse and unfamiliar regions the US military had navigated during World War II the United States defense establishment took a keen interest in these places dispatching troops to the Aleutian Islands North Africa the South Pacific and beyond To preserve the country s status as a superpower after the war to pave runways and build bridges engineers had to understand and then conquer dunes permafrost and even the surface of the moon Sand Snow and Stardust explores how the US military generated a new understanding of these environments and attempted to master them intending to cement America s planetary power Operating in these regions depended as much on scientific and cultural knowledge as on military expertise and technology From General George S Patton learning the hard way that the desert is not always hot to the challenges of constructing a scientific research base under the Arctic ice to the sheer implausibility of modeling Martian environments on Earth Gretchen Heefner takes us on a wry expedition into the

extremes and introduces us to the people who have shaped our insight into these extraordinary environments Even decades after the first manned space flight plans for human space exploration and extraplanetary colonization are still based on what we know about stark habitats on Earth An entertaining survey of the relationship between environmental history and military might Sand Snow and Stardust also serves as a warning about the further transformation of the planet whether through desertification melting ice caps or attempts to escape it entirely

**Sticky Power** Daniel Haberly, Dariusz Wójcik, 2022-05-02 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Although modern civilization revolves around money the nature of money is paradoxical It is nothing more than a representation of and medium for decentralized networks of social trust but its production is controlled by highly centralized networks of firms places and governments and there is never enough of it to go around Moreover given that the creation of money as credit is based on expectations money is at its heart an instrument for human agency to change the future However the financial systems that produce money are deeply rooted in the past and perpetuate themselves through history Sticky Power seeks to deepen our understanding of the paradox of money by introducing a novel conceptual lens Global Financial Networks to cast new light on the geography history politics and sociology of finance from the Middle Ages to the global financial crisis and beyond It shows that the power of finance is inherently sticky apparently new innovations such as

offshore finance actually date back centuries and global financial networks more broadly have adapted to the rise and fall of empires and the development of new technologies while changing surprisingly little in their basic character or at most changing very slowly Haberly and W jcik argue that a recognition of the mechanics of this durability calls for a new approach to reforming finance one less reactively focused on regulation and more proactively focused on building new institutional systems with a long term sticky power of their own
