Psychosocial Perspectives on Peacebuilding Brandon Hamber, Elizabeth Gallagher, 2014-11-04 The book Psychosocial Perspectives on Peacebuilding offers a template for those dealing with the aftermath of armed conflict to look at peacebuilding through a psychosocial lens This Volume and the case studies that are in it starts from the premise that armed conflict and the political violence that flows from it are deeply contextual and that in dealing with the impact of armed conflict context matters The book argues for a conceptual shift in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches the contributors argue that such interventions and practices should in themselves shape social change This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress The chapters in this book describe experiences within very different contexts including Guatemala Jerusalem Indian Kashmir Mozambique Northern Ireland South Africa and Sri Lanka The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster wider social change Psychosocial Perspectives on Peacebuilding is essential reading for social and peace psychologists as well as for students and researchers in the field of conflict and peace studies and for psychosocial practitioners and those working in post conflict areas for NGO s

The Northeast Question Pradip Phanjoubam, 2015-12-14 This book explores the idea psychology and political geography of Northeast India as forged by two interrelated but autonomous meta narratives First the politics of conflict inherent in and therefore predetermined by physical geography and second the larger geopolitics that was unfolding during the colonial period Unravelling the history behind the turmoil engulfing Northeast India the study contends that certain geographies most pertinently fertile river valleys and surrounding mountains which feed the rivers are integral to nature and any effort to disrupt this cohesion will result in conflict It comprehensively traces the geopolitics of the region since colonial era in particular the Great Game the

Unfinished Business Tamim Bayoumi, 2017-09-19 A penetrating critique tracing how under regulated trading between European and U S banks led to the 2008 financial crisis with a prescription for preventing another meltdown There have been numerous books examining the 2008 financial crisis from either a U S or European perspective Tamim Bayoumi is the first to explain how the Euro crisis and U S housing crash were in fact parasitically intertwined Starting in the 1980s Bayoumi outlines the cumulative policy errors that undermined the stability of both the European and U S financial sectors highlighting the catalytic role played by European mega banks that exploited lax regulation to expand into the U S market and financed unsustainable bubbles on both continents U S banks increasingly sold sub par loans to under regulated European and U S shadow banks and when the bubbles burst the losses whipsawed back to the core of the European banking system A much needed fresh look at the origins of the crisis Bayoumi's analysis concludes that policy makers are ignorant of what still needs to be done both to complete the cleanup and to prevent future crises

Planning and Design for Sustainable Urban Mobility Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter

The Transport Debate Jon Shaw, Iain Docherty, 2014-01-07 At a time when transport is high on the political agenda and government decision making is being vigorously scrutinised there is a need for an incisive and accessible analysis of the key policy issues This book is a highly readable introduction to the transport debate from two experts in the field The authors celebrate the advantages of a modern transport system but argue that years of poorly conceived and executed transport policy have resulted in Britain's transport system being far worse than it should be They show that a substandard transport system creates economic social and environmental costs but demonstrate how these can be addressed through affordable and politically deliverable changes Using a refreshingly novel approach Shaw and Docherty use the familiar idea of the journey as the basis for their discussion The book follows members of the Smith family as they uncover a wide array of transport issues including why the problems we all encounter as we travel around actually come about which policy trade offs were responsible for creating them in the first place what impacts we all have to suffer as a result and what we can do to fix them This lively and engaging approach will make the book ideal for a wide readership

Connections Jean Hillier, Jonathan Metzger, 2017-05-15 The professional practice as well as the academic discipline of planning has been fundamentally re-invented all over the world in recent decades In this astonishing transition the thinking and scholarship of Patsy Healey appears as a constantly recurring influence and inspiration around the globe The purpose of this book is to present discuss and celebrate Healey's seminal contributions to the development of the theory and practice of spatial planning The volume contains a selection of 13 less readily available but nevertheless key texts by Healey which have been selected to represent the trajectory of Patsy's work across the several decades of her research career 12 original chapters by a wide range of invited contributors take the ideas in the reprinted papers as points of departure for their own work tracing out their continuing relevance for contemporary and future directions in planning scholarship In doing so these chapters tease out the themes and interests in Healey's work which are still highly relevant to the planning project The title *Connections* symbolises relationality possibly the most outstanding element linking Patsy's ideas The book showcases the wide international influence of Patsy's work and celebrates the whole trajectory of work to show how many of her ideas on for instance the role of theory in planning processes of change networking as a mode of governance how ideas spread and
