Spatial Cultures Sam Griffiths, Alexander von Lünen, 2016-06-10 What is the relationship between how cities work and what cities mean *Spatial Cultures Towards a New Social Morphology of Cities Past and Present* announces an innovative research agenda for urban studies in which themes and methods from urban history social theory and built environment research are brought into dialogue across disciplinary and chronological boundaries The collection confronts the recurrent epistemological impasse that arises between research focussing on the description of material built environments and that which is concerned primarily with the people who inhabit govern and write about cities past and present A reluctance to engage substantively with this issue has been detrimental to scholarly efforts to understand the urban built environment as a meaningful agent of human social experience Drawing on a wide range of historical and contemporary urban case studies as well as a selection of theoretical and methodological reflections the contributions to this volume seek to historically geographically and architecturally contextualize diverse spatial practices including movement encounter play procession and neighbourhood The aim is to challenge their tacit treatment as universal categories in much writing on cities and to propose alternative research possibilities with implications as much for urban design thinking as for history and the social sciences

Understanding Urban Cycling Justin Spinney, 2020-10-28 Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling the necessity for cycle specific infrastructure and the embodied experiences of cycling Based upon primary research in a variety of contexts such as London Shanghai and Taipei this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation It argues that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and

bio political conduct which only results in solutions that prioritise those who are already mobile Accordingly the central argument of the book is not that the popularisation of cycling is inherently bad but that the manner in which cycling is being popularised gives cause for social and environmental concern Ultimately the book argues that cycling has now become a vehicle for sustaining pro growth agendas rather than subverting them or shifting to sustainable no growth de growth and less technologically driven visions of modernity This book makes an innovative contribution to the fields of Cycling Studies Mobilities and Transport and will be of interest to students and academics working in Human Geography Transport Studies Urban Studies Urban Planning Public Policy Sociology and Sustainability *London the Promised Land Revisited* Anne J. Kershen, 2016-03-09 Some two decades since the publication of *London the Promised Land* which charted and investigated the successes and failures of the migrant experience in London over a period of three hundred years this book re examines the migrant landscape in London While remaining a beacon for immigrants the migrant face of the city has changed rapidly and dramatically from one which was heavily populated by semi skilled and unskilled post colonial incomers to one which now embraces the EU Accession Countries refugees from the Middle East and Africa oligarchs from Russia the new wealthy from China economic migrants from Latin America and Ireland and still post colonial immigrants at the same time witnessing the exodus home of incomers or their descendants who now see opportunities where there were none before The contributors all leading academics and practitioners in their diverse fields examine changes to the migrant landscape of contemporary London at the micro meso and macro levels *London the Promised Land Revisited* thus explores a range of experiences in the capital including the presence and treatment of illness amongst migrants the phenomenon of migrant invisibility and asylum the migrant marketplace and ethnic clustering and interaction with local and national government across a variety of migrant groups both new and old As such this book will appeal to scholars across the social sciences with interest in migration migrant experiences and the contemporary global city **Ageing in Cities** OECD, 2015-04-30 This book examines trends in ageing societies and urban development before assessing the impact of ageing populations on urban areas and strategies for policy and governance It includes 9 case studies *Routledge Handbook of National and Regional Ocean Policies* Biliana Cicin-Sain, David Vanderzwaag, Miriam C. Balgos, 2015-05-15 This comprehensive handbook prepared by leading ocean policy academics and practitioners from around the world presents in depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross cutting and integrated national and regional ocean policy All chapters follow a common framework for policy analysis While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean such as shipping fishing oil and gas development in the last two decades the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated ecosystem based vision for the governance of ocean areas under their jurisdiction This includes goals and procedures to harmonize existing uses and laws to foster sustainable

development of ocean areas to protect biodiversity and vulnerable resources and ecosystems and to coordinate the actions of the many government agencies that are typically involved in oceans affairs The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating from the 1982 UN Law of the Sea Convention and the outcomes of the 1992 2002 and 2012 sustainable development summits The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated precautionary and anticipatory Overall the book provides a definitive state of the art review and analysis of national and regional ocean policies around the world

The Shadow of Kenyan Democracy Dominic Burbidge,2016-03-09 Why has democracy failed to reduce corruption in Kenya Framing the challenge in game theoretical terms Dominic Burbidge examines how mutual expectations between citizens dictate the success or failure of political reforms Since 1992 Kenya has conducted multiparty elections with the hope of promoting accountability and transparency in government This is being undermined by ongoing corruption and an increasingly centralised state response to terrorism Providing a nuanced assessment of democracy s difficult road in Kenya

Burbidge discusses the independent role being played by widespread social expectations of corruption Through tracking average views of the average person it is possible to identify a threshold beyond which society suffers mutually reinforcing negative social expectations This trend is the shadow of Kenyan democracy and must be treated as a policy challenge on its own terms before institutional reforms will be successful Eating the Ocean Elspeth Probyn,2016-10-13 In Eating the Ocean Elspeth Probyn investigates the profound importance of the ocean and the future of fish and human entanglement On her ethnographic journey around the world s oceans and fisheries she finds that the ocean is being simplified in a food politics that is overwhelmingly land based and preoccupied with buzzwords like local and sustainable Developing a conceptual tack that combines critical analysis and embodied ethnography she dives into the lucrative and endangered bluefin tuna market the gendered politics of sustainability the ghoulish business of producing fish meal and fish oil for animals and humans and the long history of encounters between humans and oysters Seeing the ocean as the site of the entanglement of multiple species which are all implicated in the interactions of technology culture politics and the market enables us to think about ways to develop a reflexive ethics of taste and place based in the realization that we cannot escape the food politics of the human fish relationship **Deepening Neoliberalism, Austerity, and Crisis** Julien Mercille,Enda Murphy,2015-07-07 From bank bailouts to austerity Europe s and Ireland s response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors financiers bankers and the privileged are protected The authors expose the class based nature of Ireland s crisis resolution Housing Booms in Gateway Cities David Ley,2023-06-29 HOUSING BOOMS IN GATEWAY CITIES David Ley examines the development of housing booms and policies intended to stimulate or limit them Utilising a comparative approach in five gateway cities he provides a superb understanding of the politics of booms lifting the debate beyond narrow housing and real estate studies This book is required reading for anyone interested in global cities housing markets or comparative urbanism Manuel B Aalbers Professor of Human Geography KU Leuven Belgium A stellar contribution to housing and its financialisation as central to the capitalist project globally Housing Booms offers a wonderful window into the ascendancy of the secondary circuit of real estate in Singapore Hong Kong Sydney Vancouver and London Critically through careful empirically rigorous comparison an eminent urban social scientist urges us to understand the importance of placing urban housing theoretically Loretta Lees Director of the Initiative on Cities Boston University Mastering a wealth of information and insights from five gateway cities David Ley provides fresh and inspiring explanation of both common global logics and diverse local trajectories of housing booms in the era of financialisation and asset based accumulation A timely and ground breaking contribution re positioning housing to the centrality pervasively felt in everyday life but largely unacknowledged in mainstream social science George Lin Chair Professor of Geography University of Hong Kong In Housing Booms in Gateway Cities renowned geographer Dr David Ley delivers a detailed exploration of housing markets in Hong Kong Singapore Sydney Vancouver and

London and explains why these gateway cities have seen dramatic increases in residential real estate prices since the 1980s. The author describes how the globalization of real estate has rapidly inflated demand and uncoupled local housing prices from local wages causing acute problems of affordability, availability and inequality. The book implicates government policy in massive real estate price inflation, describing a shift from welfare based to asset based societies. It also highlights the relatively unique experience in Singapore where asset based housing policy has encouraged the dispersion of ownership and accumulation through an increased supply of subsidized leasehold apartments and the regulation of disruptive investment flows. *Housing Booms in Gateway Cities* is an ideal resource for academics, students and policymakers with an interest in urban geography, sociology and planning, housing studies and any of the cities discussed in the book. It is an innovative treatment of housing as a central category in wealth accumulation in urban economies and societies. **The Complacent**

Class Tyler Cowen, 2017-02-28. A Wall Street Journal and Washington Post Bestseller. Tyler Cowen's blog *Marginal Revolution* is the first thing I read every morning. And his brilliant new book *The Complacent Class* has been on my nightstand after I devoured it in one sitting. I am at round the clock Cowen saturation right now. Malcolm Gladwell. Since Alexis de Tocqueville, restlessness has been accepted as a signature American trait. Our willingness to move, take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs. The problem, according to legendary blogger, economist and best selling author Tyler Cowen, is that Americans today have broken from this tradition. We're working harder than ever to avoid change. We're moving residences less, marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different. Match.com matches us in love, Spotify and Pandora match us in music, Facebook matches us to just about everything else. Of course, this matching culture brings tremendous positives: music we like, partners who make us happy, neighbors who want the same things. We're more comfortable. But according to Cowen, there are significant collateral downsides attending this comfort among them: heightened inequality and segregation and decreased incentives to innovate and create. *The Complacent Class* argues that this cannot go on forever. We are postponing change due to our near-sightedness and extreme desire for comfort, but ultimately this will make change when it comes harder. The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis, impossibly expensive rentals for our most attractive cities, worsening of residential segregation and a decline in our work ethic. The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again. **Spiritual and Religious Tourism**
