**Drawing Futures** Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura

Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings, and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

**Politics and Pan-Africanism** Dawn Nagar, 2019-12-12  
Offering an examination of the diplomatic and economic regional power structures in Africa and their relationships with each other, Dawn Nagar discusses the potential and future of pan-Africanism. The three primary regional economic communities (RECs) that are recognised by the African Union as the key building blocks of a united Africa are examined: these are the Common Market for Eastern and Southern Africa (COMESA), the East African Community (EAC), and the Southern African Development Community (SADC). These RECs include Africa's major economies: Egypt, South Africa, and Kenya, but are also home to Africa's most conflict-prone and volatile states: the Democratic Republic of the Congo (DRC), Burundi, South Sudan, Somalia, and Lesotho. Providing a detailed overview of the current relationship between these power blocs, this book provides insight into the current state of diplomatic and economic relations within Africa and shows how far there is to go for a future of Pan-Africanism.

**Dictators Without Borders** Alexander A. Cooley, John Heathershaw, 2017-02-07  
A penetrating look into the unrecognized and unregulated links between autocratic regimes in Central Asia and centers of power and wealth throughout the West. Weak, corrupt, and politically unstable, the former Soviet republics of Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan are dismissed as isolated and irrelevant to the outside world. But are they? This hard-hitting book argues that Central Asia is in reality a globalization leader with extensive involvement in economics, politics, and security dynamics beyond its borders. Yet Central Asia's international activities are mostly hidden from view with disturbing implications for world security. Based on years of research and involvement in the region, Alexander Cooley and John Heathershaw reveal how business networks, elite bank accounts, overseas courts, third-party brokers, and Western lawyers connect Central Asia's supposedly isolated leaders with global power centers. The authors also uncover widespread Western participation in money laundering, bribery, foreign lobbying by autocratic governments, and the exploiting of legal loopholes within Central Asia.

Riveting and important this book exposes the global connections of a troubled region that must no longer be ignored The Rise and Rise of Illegal Ticket Touting Alessandro Moretti, 2023-02-10 This book presents an ethnographic study of contemporary ticket touts in the UK Despite the recent interest in the topic of black market ticket sales media coverage and parliamentary interventions over the last ten years have revealed a widespread lack of knowledge with regard to the phenomenon of touting and the players engaging in the practice The Rise and Rise of Illegal Ticket Touting sheds light on the world of touting and delivers an authentic picture of the individuals involved of their methods values and motivations for performing ticket touting as an organised entrepreneurial deviant activity The touts varied methods of buying and selling tickets the hierarchical structures and strict ethos of their criminal organisations and their specific *modi operandi* for evading detection and arrest both on the streets and online are focal points of the study Of equal importance are the touts attitudes perceptions and adaptations to or outright dismissal of society's legal and moral frameworks This book illuminates why historic and renewed attempts to challenge ticket touting have been unsuccessful focusing on inadequate legislation a lack of enforcement and the widespread corruption and exploitable loopholes that exist within the official primary ticket market An accessible and compelling read The Rise and Rise of Illegal Ticket Touting will appeal to students and scholars of criminology sociology social policy policing and all those with an interest in live music and sport and the hidden practices that lurk beneath the surface

**China and Its Small Neighbors** Sung Chull Kim, 2023-03-01 In China and Its Small Neighbors Sung Chull Kim examines the political implications of the economic asymmetry between China and its small neighbors part of wider changes in international relations brought about by the rise of China While being critical of the current trend that focuses on the China U S rivalry alone Kim argues that a microanalysis of China's advances toward its neighbors is a guide to understanding the trajectory of China's expanding influence and transitions in world politics more broadly Economic asymmetry as seen in trade concentration non transparency and reliance on bilateral aid has made China's small neighbors vulnerable on the political front thus generating potential threats to their sovereignty and independence Because China has the upper hand in the bilateral relationships these weak states practice dual core hedging as a strategy for survival They hedge on China for expected economic benefits and at the same time hedge against their powerful neighbor to mitigate the risks involved in that hedging on Each small state's mode of hedging depends on its degree of vulnerability and its availability of policy instruments such as multilateral institutions and bilateral partnerships with extra regional powers

Including the Excluded in South Asia Madhushree Sekher,Radu Carciumaru,2019-10-19 This book analyses and discusses the multiple dimensions of social exclusion inclusion seen in South Asia It not only captures how social exclusion is intrinsic to deprivation or deprivation in itself but also the processes of political engagement and social interactions that the socially

excluded develop as strategies and networks for their advancement Consequently the book goes beyond structures or agency and examines the question of a more dynamic approach to provide spaces for the socially excluded to self manage exclusion thereby raising discussions around the contested positions that underlie development discourse on social inequality While social exclusion linked to identities is studied the book argues that hierarchies and inequalities based on social identities cut across and affect various groups of excluded Consequently these phenomena create or lead to various processes of exclusion The book illustrates that social exclusion should not be limited to privileging the differences that characterize the exclusionary processes but should also comprise underpinning strategies of inclusion emphasizing the need to focus on imperatives to include As a result the book acknowledges that social exclusion is not limited to analyzing the different identities that face exclusion but also understanding the systems and processes that create social exclusion or create opportunities for inclusion of the excluded The book addresses readership across academic disciplines including in the growing field of state capacity and governance and practitioners administrators and policy making communities Conclusively the book provides a platform to intensively exchange the multifaceted and critical issue of social exclusion inclusion and thus contributes to inclusive sustainable development discourse

**Antisemitism and Islamophobia in Europe** James Renton, Ben Gidley, 2017-04-05 This is the first book to examine the relationship between European antisemitism and Islamophobia from the Crusades until the twenty first century in the principal flashpoints of the two racisms With case studies ranging from the Balkans to the UK the contributors take the debate away from politicised polemics about whether or not Muslims are the new Jews Much previous scholarship and public discussion has focused on comparing European ideas about Jews and Judaism in the past with contemporary attitudes towards Muslims and Islam This volume rejects this approach Instead it interrogates how the dynamic relationship between antisemitism and Islamophobia has evolved over time and space The result is the uncovering of a previously unknown story in which European ideas about Jews and Muslims were indeed connected but were also ripped apart Religion empire nation building and war all played their part in the complex evolution of this relationship As well as a study of prejudice this book also opens up a new area of inquiry how Muslims Jews and others have responded to these historically connected racisms The volume brings together leading scholars in the emerging field of antisemitism Islamophobia studies who work in a diverse range of disciplines anthropology history sociology critical theory and literature Together they help us to understand a Europe in which Jews and Arabs were once called Semites and today are widely thought to be on two different sides of the War on Terror

Daniel Haberly, Dariusz Wójcik, 2022-05-02 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Although modern civilization revolves around money, the nature of money is paradoxical. It is nothing more than a representation of and medium for decentralized networks of social trust, but its production is controlled by highly centralized networks of firms, places, and governments, and there is never enough of it to go around. Moreover, given that the creation of money as credit is based on expectations, money is at its heart an instrument for human agency to change the future. However, the financial systems that produce money are deeply rooted in the past and perpetuate themselves through history. *Sticky Power* seeks to deepen our understanding of the paradox of money by introducing a novel conceptual lens. *Global Financial Networks* casts new light on the geography, history, politics, and sociology of finance from the Middle Ages to the global financial crisis and beyond. It shows that the power of finance is inherently sticky; apparently new innovations such as offshore finance actually date back centuries, and global financial networks more broadly have adapted to the rise and fall of empires and the development of new technologies while changing surprisingly little in their basic character or at most changing very slowly. Haberly and Wójcik argue that a recognition of the mechanics of this durability calls for a new approach to reforming finance: one less reactively focused on regulation and more proactively focused on building new institutional systems with a long-term sticky power of their own. *The Oxford Handbook of Irish Politics* David M. Farrell, Niamh Hardiman, 2021-09-01 Ireland has enjoyed continuous democratic government for almost a century, an unusual experience among countries that gained their independence in the 20th century. But the way this works in practice has changed dramatically over time. Ireland's colonial past had an enduring influence over political life for much of the time since independence, enabling stable institutions of democratic accountability while also shaping a dismal record of economic underdevelopment and persistent emigration. More recently, membership of the EU has brought about far-reaching transformation across almost all aspects of Irish life. But if anything, the paradoxes have only intensified. Now one of the most open economies in the world, Ireland has experienced both rapid growth and one of the most severe crashes in the wake of the Great Recession. On some measures, Ireland is among the most affluent countries in the world, yet this is not the lived experience for many of its citizens. Ireland is an unequivocally modern state, yet public life continues to be marked by formative ideas and values in which tradition and modernity are held in often uneasy embrace. It is a small state that has ambitions to leverage its distinctive place in the Atlantic and European worlds to carry more weight on the world stage. Ireland continues to be deeply connected to Britain through ties of culture and trade, now matters of deep concern in the context of Brexit. And the old fault lines between North and South, between Ireland and Britain, which had been at the core of one of Europe's longest and bloodiest civil conflicts, risk being reopened by Britain's new hard-edged approach to national and European identities. These key issues are teased out in the 41 chapters of this book, making this the most comprehensive

volume on Irish politics to date      *The Politics of International Interaction with de facto States* Eiki Berg, James Ker-Lindsay, 2020-05-21 This comprehensive volume is the first systematic effort to explore the ways in which recognised states and international organisations interact with secessionist de facto states while maintaining the position that they are not regarded as independent sovereign actors in the international system It is generally accepted by policy makers and scholars that some interaction with de facto states is vital if only to promote a resolution of the underlying conflict that led to their decision to break away and yet this policy of engagement without recognition is not without complications and controversy This book analyses the range of issues and problems that such interaction inevitably raises The authors highlight fundamental questions of sovereignty conflict management and resolution settlement processes foreign policy and statehood This book will be of interest to policy makers students and researchers of international relations It was originally published as a special issue of the journal *Ethnopolitics*

*The Economics of the Global Defence Industry* Keith Hartley, Jean Belin, 2019-11-08 This book makes an original contribution to our knowledge of the world's major defence industries Experts from a wide range of different countries from the major economies of North America and Western Europe to developing economies and some unique cases such as China India Singapore South Africa and North Korea describe and analyse the structure conduct and performance of the defence industry in that country Each chapter opens with statistics on a key nation's defence spending its spending on defence R D and on procurement over the period 1980 to 2017 allowing for an analysis of industry changes following the end of the Cold War After the facts of each industry the authors describe and analyse the structure conduct and performance of the industry The analysis of structure includes discussions of entry conditions domestic monopoly oligopoly structures and opportunities for competition The section on conduct analyses price non price competition including private and state funded R D and performance incorporates profitability imports and exports together with spin offs and technical progress The conclusion explores the future prospects for each nation's defence industry Do defence industries have a future What might the future defence firm and industry look like in 50 years time This volume is a vital resource and reference for anyone interested in defence economics industrial economics international relations strategic studies and public procurement
