Patriarchy Inc. Cordelia Fine, 2025-08-19 A razor sharp and quick witted analysis of why we need a new approach to fixing the gender inequality embedded in work Work remains much as it always has men occupy the vast majority of leadership roles and are overrepresented in positions from engineer to plumber We see many jobs as male or female with women dominating in healthcare and childcare professions Pretending that this is the natural state of things or that instead both sexes should submit to working 24 7 is just not right In Patriarchy Inc Cordelia Fine examines with razor sharp and quick witted analysis why gender inequality is embedded in the workplace and why it has to change Drawing on theories from evolutionary science psychology economics and sociology she examines two of the most prominent movements in the corporate world The Different But Equal viewpoint espouses that women are in the jobs they want despite their lower status and salaries In the meantime DEI Diversity Equity Inclusion has become a slogan that emphasizes productivity and profit not fair play Fine shows how both are wrong and the bad effects on everyone when men are still stuck in traditional breadwinner roles and women are having to fight for their due Offering perceptive and much needed insight into the current state of work Patriarchy Inc explores how we can get closer to achieving equality even if it means upturning business as usual

Geopolitics, Geography and Strategic History Geoffrey Sloan, 2017-02-17 This work explains the course of international politics from the rebirth of the German Empire to the rise of China with particular though not exclusive reference to spatial relationships

**Livable Streets 2.0** Bruce Appleyard, 2021-03-22 Livable Streets 2 0 offers a thorough examination of the struggle between automobiles residents pedestrians and other users of streets along with evidence based practical strategies for redesigning city street networks that support urban livability In 1981 when Donald Appleyard s Livable Streets was published it was globally recognized as a groundbreaking work one of the most influential urban design books of its time Unfortunately he was killed a year later by a speeding drunk driver This latest update Livable Streets 2 0 revisited by his son Bruce updates the topic with the latest research new case studies and best human centered practices for creating more livable streets for all It is essential reading for those who influence future directions in city and transportation planning urban design and community regeneration and placemaking Incorporates the most current empirical research on urban transportation and land use practices that support the need for more livable communities Includes recent case studies from around the world on successful projects campaigns programs and other efforts Contains new coverage of vulnerable populations

Placing Internationalism Stephen Legg, Mike Heffernan, Jake Hodder, Benjamin Thorpe, 2021-11-04 Exploring how modern internationalism emerged as a negotiated process through international conferences this edited collection studies the spaces and networks through which states civil society institutions and anti colonial political networks used these events to realise their visions of the international Taking an interdisciplinary approach contributors explore the spatial paradox of two fundamental features of modern internationalism First internationalism demanded the overcoming of space

transcending the nation state in search of the shared interests of humankind Second internationalism was geographically contingent on the places in which people came together to conceive and enact their internationalist ideas From Paris 1919 to Bandung 1955 and beyond this book explores international conferences as the sites in which different forms of internationalism assumed material and social form While international permanent institutions such as the League of Nations UN and Institute of Pacific Relations constantly negotiated national and imperial politics lesser resourced political networks also used international conferences to forward their more radical demands Taken together these conferences radically expand our conception of where and how modern internationalism emerged and make the case for focusing on internationalism in a contemporary moment when its merits are being called into question **Marine and Coastal**

**Resources of India** Srikumar Chattopadhyay,2025-07-30 This edited volume covers a wide variety of topics related to the geomorphology of India s coasts India s coastal resources and the human and physical sciences surrounding both The contents of this book consist of thirty three scholarly articles including introduction and conclusion contributed by academics and professionals mostly from India The work presented here is multidisciplinary with contributors coming from geography geology marine geology oceanography fishery agriculture engineering management forestry and other allied disciplines The papers contributed by experts from the respective fields discuss a wide range of subject matters dealing with some of the crucial aspects of marine and coastal resources including importance of the Indian Ocean and blue economy in Indian s future development This book will be useful for academics professionals researchers and students interested in marine and coastal resource management Sustainable Peace in Northeast Asia Yong-Shik Lee,2023-09-05 Sustainable Peace in

Northeast Asia examines the causes of lasting and complex tensions in the region from underlying political historical military and economic perspectives discusses their historical development and political economic implications for the world and explores possible solutions to build lasting peace The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances diplomacy trade and investment The book also discusses the influence of these external powers over the crisis their political and economic objectives in the region their strategies and the dynamics that their engagement has created Both South Korea and North Korea have sought reunification of the Korean peninsula which will have a substantial impact on the region The book examines its justification feasibility and effects for the region The book discusses the role of Mongolia in the context of the power dynamics in Northeast Asia A relatively small country in terms of its population Mongolia has rarely been examined in this context Sustainable Peace in Northeast Asia makes a fresh assessment of its potential role The Russian State and Russian Energy Companies, 1992-2018 Ingerid M. Opdahl,2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia s

foreign policy in the post Soviet region The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018 Energy companies roles in institutional development enabled them to influence foreign policy formation and they became available as tools to implement foreign policy The extent to which it happened for each company varied with their accessibility to the Russian state Institutional development increased state capacity in a way that strengthened Russia's political regime The book shows how the combined power of several companies in the gas oil electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia's regional position In this way Russia's energy resources were converted to regional influence The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post Soviet states

The Politics of Arctic Resources E. Keskitalo, 2019-04-10 The Arctic has often been seen as a natural area or even a wilderness where mainly indigenous and subsistence activities have been prominent Contrary to this the present volume highlights the very long historical development of resource use systems in northern Europe across multiple actors and multiple levels and including varying population groups The book takes a past present future perspective that illustrates the paths to institutional emergence change or persistence over time It also illustrates how institutions may themselves drive changes through a focus on resource use cases in northern Europe This volume demonstrates that understanding northern issues is less about understanding sets of geophysical climatological or environmental conditions than about understanding social and institutional structures Understanding these trajectories into the future is seen as a key way of understanding what responses to future change may be likely and what the institutions are that will shape limit or enable our responses to climate change This book will be of great use to scholars and graduates in the fields of Arctic and northern region politics and to researchers of resource use and climate change with a focus on vulnerability social vulnerability adaptation and mitigation

**Sanctuary Cities, Communities, and Organizations** Melvin Delgado, 2018-08-29 The term sanctuary city gained a new level of national recognition during the 2016 United States presidential election and immigration policies and debates have remained a top issue since the election of Donald Trump The battle over immigration and deportation will be waged on many fronts in the coming years but sanctuary cities municipalities that resist the national government's efforts to enforce immigration laws are likely to be on the front lines for the immediate future and social workers and others in the helping professions have vital roles to play In this book Melvin Delgado offers a compelling case for the centrality of sanctuary cities cause to the very mission and professional identity of social workers and others in the human services and mental health professions The text also presents a historical perspective on the rise of the sanctuary movements of the 1970s and 2000s thereby giving context to the current environment and immigration debate Sanctuary Cities Communities and Organizations serves as a helpful resource for human service practitioners academics and the general public alike

*The Sense of Power* Carl Berger, 2013-01-01 Prior to the publication of *The Sense of Power* most

studies of the Canadian movement for imperial unity focused on commercial policy and military and naval cooperation This influential book demonstrated that the movement which held that Canada could only become a great nation within the British Empire was significantly influenced by its leading advocates belief in nationalism Carl Berger explores the emotional appeal and intellectual context of this belief arguing that these advocates support of imperial unity can be grasped only in terms of their commitment to certain conservative values and in relation to their conception of Canada The Sense of Power was commended by the Toronto Star when it was first published as entertaining as well as brilliant and in 2011 Ramsay Cook noted that few first books or for that matter few books have made as marked an impact on the interpretation of a major theme in Canadian history This second edition brings to life the work s incisive analysis and its important contribution to Canadian intellectual history

*Policy Instruments for Environmental and Natural Resource Management* Thomas Sterner, Jessica Coria, 2013-10-30 Thomas Sterner s book is an attempt to encourage more widespread and careful use of economic policy instruments The book compares the accumulated experiences of the use of economic policy instruments in the U S and Europe as well as in rich and poor countries in Asia Africa and Latin America Ambitious in scope it discusses the design of instruments that can be employed in any country in a wide range of contexts including transportation industrial pollution water pricing waste fisheries forests and agriculture While deeply rooted in economics *Policy Instruments for Environmental and Natural Resource Management* is informed by political legal ecological and psychological research The new edition enhances what has already been widely hailed as a highly innovative work The book includes greatly expanded coverage of climate change covering aspects related to policy design international equity and discounting voluntary carbon markets permit trading in United States and the Clean Development Mechanism Focusing ever more on leading ideas in both theory and policy the new edition brings experimental economics into the main of its discussions It features expanded coverage of the monitoring and enforcement of environmental policy technological change the choice of policy instruments under imperfect competition and subjects such as corporate social responsibility bio fuels payments for ecosystem services and REDD
