**India China** L.H.M. Ling, Adriana Erthal Abdenur, Payal Banerjee, Nimmi Kurian, Mahendra P. Lama, Li Bo, 2021-03-11 Challenging the Westphalian view of international relations which focuses on the sovereignty of states and the inevitable potential for conflict the authors from the Borderlands Study Group reconceive borders as capillaries enabling the flow of material cultural and social benefits through local communities nation states and entire regions By emphasizing local agency and regional interdependencies this metaphor reconfigures current narratives about the China India border and opens a new perspective on the long history of the Silk Roads the modern BCIM Initiative and dam construction along the Nu River in China and the Teesta River in India Together the authors show that positive interaction among people on both sides of a border generates larger cross border communities which can pressure for cooperation and development India China offers the hope that people divided by arbitrary geo political boundaries can circumvent race gender class religion and other social barriers to form more inclusive institutions and forms of governance

backwardness and primitiveness     The Populist Temptation Barry Eichengreen, 2018-05-03 Populism of the right and left has spread like wildfire throughout the world The impulse reached its apogee in the United States with the election of Trump but it was a force in Europe ever since the Great Recession sent the European economy into a prolonged tailspin In the simplest terms populism is a political ideology that vilifies economic and political elites and instead lionizes the people The people populists of all stripes contend need to retake power from the unaccountable elites who have left them powerless And typically populists distrust of elites shades into a catchall distrust of trained experts because of their perceived distance from and contempt for the people Another signature element of populist movements is faith in a savior who can not only speak directly to the people but also serve as a vessel for the plain people's hopes and dreams Going back to the 1890s a series of such saviors have come and gone in the US alone from William Jennings Bryan to Huey Long to finally Donald Trump In *The Populist Temptation* the eminent economic historian Barry Eichengreen focuses on the global resurgence of populism today and places it in a deep context Alternating between the present and earlier populist waves from modern history he argues that populists tend to thrive most in the wake of economic downturns when it is easy to convince the masses of elite malfeasance Yet while there is more than a grain of truth that bankers financiers and bought politicians are responsible for the mess populists own solutions tend to be simplistic and economically counterproductive Moreover by arguing that the ordinary people are at the mercy of extra national forces beyond their control international capital immigrants cosmopolitan globalists populists often degenerate into demagoguery and xenophobia There is no one solution to addressing the concerns that populists raise but Eichengreen argues that there is an obvious place to start shoring up and improving the welfare state so that it is better able to act as a buffer for those who suffer most during economic slumps For example America's patchwork welfare state was not well equipped to deal with the economic fallout that attended globalization and the decline of manufacturing in America and that played no small part in Trump's victory Lucidly explaining both the appeals and dangers of populism across history this book is essential reading for anyone seeking to understand not just the populist phenomenon but more generally the lasting political fallout that follows in the wake of major economic crises

*Cooperation and Conflict between Europe and Russia* Magdalena Dembińska, Frederic Mérand, 2021-08-26 When thinking about relations between Europe and Russia International Relations scholars focus on why conflict has replaced cooperation The geostrategic debate excludes the possible coexistence of cooperation and conflict Tracking the evolution of conflict and cooperation patterns in three zones of contact Estonia Kaliningrad and Moldova between 1991 and 2016 this edited volume argues that although the standard narrative remains compelling local patterns of cooperation and conflict are partly autonomous from the geostrategic level To account for the coexistence of cooperation and conflict the first chapter elaborates a theoretical proposition distinguishing fluid rigid and disputed symbolic boundaries which have different impacts on the ground The subsequent chapters address distinct dimensions of Euro Russian relations paying attention to local reality

in Estonia Moldova Ukraine or Kaliningrad different sectors from energy to peoples movement and across institutional contexts such as the EU and NATO They confirm that the standard narrative holds in most cases but also that Euro Russian relations vary in crucial ways according to the interests and representations of actors immersed in specific geopolitical fields Despite a deterioration of geostrategic relations between Europe and Russia since the end of the Soviet Union Cooperation and Conflict between Europe and Russia explores the intriguing coexistence of conflict and cooperation at the local level and across sectors and institutions The chapters in this book were originally published as a special issue of the journal East European Politics

**Handbook of Traumatic Loss** Neil Thompson, Gerry R. Cox, Robert G. Stevenson, 2017-01-06 The Handbook of Traumatic Loss adopts a broad holistic approach that recognizes traumatic loss much more fully as a multidimensional human phenomenon not simply a medical condition Initial chapters build a foundation for understanding traumatic loss and explore the many ways we respond to trauma Later chapters counterbalance the individualistic focus of dominant approaches to traumatic loss by highlighting a number of thought provoking social dimensions of traumatic loss Each chapter emphasizes different aspects of traumatic loss and argues for ways in which clinicians can help deal with its many and varied impacts

*Security after Christendom* John Heathershaw, 2024-02-13 We live in the wealthiest and most heavily defended world in history so why do we feel so insecure In a secular world what does Christian theology have to say about this problem Security after Christendom combines practical examples social scientific research and an ecumenical approach to political theology to answer these questions It argues that Christendom was a plural phenomenon of imagined security communities of East and West whose unravelling continues to have implications for global politics today as dramatically illustrated by Russia's war in Ukraine While notions of a new Christendom are idolatrous and delusional secular imaginaries of national security or the liberal international order are both destructive and unstable True security radical inclusion nonviolent protection and abundant provision is an eschatological phenomenon inaugurated by Christ Security after Christendom is neither found in faithful government nor an exclusive church as polis approach but in relations of tension where the fallen powers are continuously confronted by prophetic practices A post Christendom community expresses its love for the world by seeking its security providentially limiting the disorders of the secular age and offering glimmers of a new earth

**From Head Shops to Whole Foods** Joshua C. Davis, 2017-08-08 In the 1960s and 70s a diverse range of storefronts including head shops African American bookstores feminist businesses and organic grocers brought the work of the New Left Black Power feminism environmentalism and other movements into the marketplace Through shared ownership limited growth and democratic workplaces these activist entrepreneurs offered alternatives to conventional profit driven corporate business models By the middle of the 1970s thousands of these enterprises operated across the United States but only a handful survive today Some such as Whole Foods Market have abandoned their quest for collective political change in favor of maximizing profits Vividly portraying the struggles successes and sacrifices of these unlikely entrepreneurs From

Head Shops to Whole Foods writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today s companies have adopted the language but not often the mission of liberation and social change

*Travel, Travel Writing, and British Political Economy* Brian P. Cooper, 2021-11-10 The book draws on the history of economics literary theory and the history of science to explore how European travelers like Alexander von Humboldt and their readers circa 1750 1850 adapted the work of British political economists such as Adam Smith to help organize their observations and in turn how political economists used travelers observations in their own analyses Cooper examines journals letters books art and critical reviews to cast in sharp relief questions raised about political economy by contemporaries over the status of facts and evidence whether its principles admitted of universal application and the determination of wealth value and happiness in different societies Travelers citing T R Malthus s population principle blurred the gendered boundaries between domestic economy and British political economy as embodied in the idealized subjects domestic woman and economic man The book opens new realms in the histories of science in its analyses of debates about gender in social scientific observation Maria Edgeworth Maria Graham and Harriet Martineau observe a role associated with women and methodically interpret what they observe an act reserved in theory by men
