Young Geographers Gert Ruepert, Tijana Ilić, 2023-09-22 This book shows an updated overview of research about human geography topics like urban growth, urban challenges, transportation, landscape, land cover, geospatial analysis, regional planning, local development, cultural geography, tourism, and so on. Between 2020 and 2022, due to COVID-19 and lockdowns worldwide, there were fewer opportunities for young and upcoming researchers to present their state-of-the-art findings at conferences. In order to highlight exceptional research of young geographers during this time, the idea for this book was created. In collaboration with the EGEA alumni foundation for students and young geographers, 12 authors were selected to showcase their scientific work. In addition to that, most of them present amazing maps and figures as outstanding expressions of the need of GIS for geography research.

Beyond BIM Danelle Briscoe, 2015-10-14 Beyond BIM explores the vast and under-explored design potential undertaken by information modeling. Through a series of investigations grounded in the analysis of built work, interviews with leading practitioners, and speculative projects, the author catalogs the practical advantages and theoretical implications of exploiting BIM as a primary tool for design innovation. Organized by information type, such as geographic data, local code, or materials, each chapter suggests a realm of knowledge that can be harvested and imported into BIM to give meaningful specificity to architectural form and space. While highly sustainable, the work documented and envisioned in this book moves well beyond normalization to reveal inventive takes on contemporary practice. Beyond BIM serves as a primary resource for professional architects, from practice researchers and designers engaged in information-related spatial design processes, as well as students and faculties of architecture schools in search of BIM design inspiration. Likewise, those highly attuned to computation and unconventional ways of creating form and space, particularly

built outcomes that utilize BIM will find this book meaningful and essential *Collecting Activism, Archiving Occupy Wall Street* Kylie Message, 2019-09-10 *Collecting Activism Archiving Occupy Wall Street* explores the material collections produced by participants of Occupy Wall Street in 2011 that bear witness to the experience and agency of the 99% Examining processes of collection development as a lens through which to investigate the sociology of protest and reform movements the book questions what contribution a dual study of the material culture of dissent and the production of a collection hosting the material culture of dissent might offer to a range of disciplines and practices It asks if and how a collections based study can test the propositions tactics and limits of activism from archival museological and political perspectives *Collecting Activism Archiving Occupy Wall Street* draws from interdisciplinary fields including museum studies collection studies archive studies cultural studies and public history It will be a valuable resource for scholars and practitioners engaged with contemporary cause based collecting activist archiving public history and the cultural politics and sociology of social reform movements It models strategies for activating historical archives and collections based data and for engaging with autoethnographic records to represent and analyze the material residue of protest and reform movements today **Spatial Modernities** Johannes Riquet, Elizabeth Kollmann, 2018-06-12 This collection of essays offers a series of reflections on the specific literary and cultural forms that can be seen as the product of modernity's spatial transformations which have taken on new urgency in today's world of ever increasing mobility and global networks The book offers a broad perspective on the narrative and poetic dimensions of the modern discourses and imaginaries that have shaped our current geographical sensibilities In the early twenty first century we are still grappling with the spatial effects of early and high modern developments and the contemporary crises revolving around political boundaries and geopolitical orders in many parts of the world have intensified spatial anxieties They call for a sustained analysis of individual perceptions cultural constructions and political implications of spatial processes movements and relations The contributors of this book focus both on the spatial orders of modernity and on the various dynamic processes that have shaped our engagement with modern space **Accomplishing Climate Governance** Harriet Bulkeley, 2016 This book provides original critical insights into climate politics and new directions for society's response for researchers advanced students and policy makers **The Routledge Handbook of Heritage and Gender** Jenna C.
