**Powerful Geography** Mark Enser,2021-02-01 In recent years the emphasis has shifted away from a focus on pedagogy the how of teaching and towards curriculum the what of teaching Ofsted's revised inspection framework reflects this shift and their plans to deep dive into subject areas meaning that teachers and department heads now need a much greater understanding of curricular structures leave many educators having to think about their subject in new ways Luckily for geography teachers

however bestselling author Mark Enser provides plenty of insightful subject specific guidance in this all encompassing book Mark explores both the purpose of the geography curriculum and its various applications in practice He details how teachers can take their students learning beyond the acquisition of knowledge to transform how they see the world He also tackles the changing nature of school geography shares a variety of case studies and offers his take on how best to facilitate geographical enquiry and fieldwork The first part of the book considers the issue of purpose by looking at the role of the school in society and then shows the place that geography occupies within it It also considers the history of the subject so as to help geography teachers better understand where they stand today and concludes by discussing how the concepts of powerful knowledge and GeoCapabilities can help them find their way again The second part is a practical guide which illustrates how to put this theory of curriculum purpose into practice It explores the steps which must be taken to create a powerful geography curriculum by deciding on content and places to be studied putting the components into a sequence and then using all this to do geography It will also discuss the extent to which teachers need to consider the future and respond to the concerns of the wider world when planning the curriculum Suitable for department heads and classroom teachers of geography in secondary schools and subject leads in primary schools Powerful Geography was Highly Commended in the Geographical Association Awards 2022

**IAS Mains Paper 1 Indian Heritage & Culture History & Geography of the world & Society 2021** Janmenjay Sahni, Prajwal Sharma, Azmat Ali, Vivek Sharma, Dr. Priya Goel, 2020-10-01 Voices from the Forest Malcolm Cairns, 2010-09-30 This handbook of locally based agricultural practices brings together the best of science and farmer experimentation vividly illustrating the enormous diversity of shifting cultivation systems as well as the power of human ingenuity Environmentalists have tended to disparage shifting cultivation sometimes called swidden cultivation or slash and burn agriculture as unsustainable due to its supposed role in deforestation and land degradation However a growing body of evidence indicates that such indigenous practices as they have evolved over time can be highly adaptive to land and ecology In contrast scientific agricultural solutions imposed from outside can be far more damaging to the environment Moreover these external solutions often fail to recognize the extent to which an agricultural system supports a way of life along with a society's food needs They do not recognize the degree to which the sustainability of a culture is intimately associated with the sustainability and continuity of its agricultural system Unprecedented in ambition and scope Voices from the Forest focuses on successful agricultural strategies of upland farmers More than 100 scholars from 19 countries including agricultural economists ecologists and anthropologists collaborated in the analysis of different fallow management typologies working in conjunction with hundreds of indigenous farmers of different cultures and a broad range of climates crops and soil conditions By sharing this knowledge and combining it with new scientific and technical advances the authors hope to make indigenous practices and experience more widely accessible and better understood not only by researchers and development practitioners but by other communities of farmers around the world

Human Rights Approaches to Climate Change Sumudu Atapattu,2015-10-16 Despite the clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change its catastrophic impact on human beings was not really understood as a human rights issue until recently This book examines the link between climate change and human rights in a comprehensive manner It looks at human rights approaches to climate change including the jurisprudential bases for human rights and the environment the theoretical framework governing human rights and the environment and the different approaches to this including benchmarks In addition to a discussion of human rights implications of international environmental law principles in the climate change regime the book explores how the human rights framework can be used in relation to mitigation adaption and adjudication Other chapters examine how vulnerable groups women indigenous

peoples and climate refugees would be disproportionately affected by climate change The book then goes on to discuss a new category of people created by climate change those who will be rendered stateless as a result of states disappearing and displaced by climate change and whether human rights law can adequately address these emerging issues The New World Isaiah Bowman, 1921
