

Small business owners are often faced with the challenge of finding the right mix of products and services to offer their customers. This is especially true for those who are just starting out or looking to expand their offerings. One way to address this challenge is by using a combination of data-driven insights and creative thinking. For example, a small business owner might use data to identify the most popular products and services in their market, and then use creative thinking to develop new and innovative offerings that meet the needs of their customers. By combining data and creativity, small business owners can create a unique and competitive offering that sets them apart from the competition.
