The UK Regional-National Economic Problem

Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Climate Change, Migration and Conflict in Bangladesh Md Rafiqul Islam, 2023-08-18 This book explores the relationship between climate change induced migration and conflict in Bangladesh one of the most ecologically fragile countries in the world It explores why people migrate from their original place of land and how the migration of people with a different background to an ethnically distinctive region due to environmental changes can become a source of conflict and violence between the host peoples and migrants The volume focuses on the Chittagong Hill Tracts CHT which has experienced long standing ethno-political conflict due to the settlement and migration of the Bengali people from the plain land of Bangladesh This settlement and migration were mainly caused climatic events such as floods cyclones sea level rise and disasters It traces the history of the ethnic conflict in the region and presents key findings from the field as well as the dynamics of everyday politics in the region This volume also highlights how internally climate displaced people generate violence and civil strife in the major urban cities through their settlements in slums The volume will be of great interest to scholars and researchers of environmental studies human geography migration and diaspora studies public policy social anthropology and South Asian studies

Push Back Judith Large, 2016-12-15 In 2009 after decades of conflict the Sri Lankan government proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam Subsequently the state proved resistant to attempts by the UN and other international bodies to promote post war reconciliation or reform In this incisive new work Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic

efforts as well as exploring the wider context of rising Sinhalese nationalism the attendant growth of discrimination against minorities and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace Push Back is vital reading not only for those interested in Sri Lanka but also for those concerned about the wider implications of the conflict for human rights peace making and geopolitics

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 Rare Earth Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation

Climate Change from the Streets Michael Méndez, 2020-01-07 An urgent and timely story of the contentious politics of incorporating environmental justice into global climate change policy Although the science of climate change is clear policy decisions about how to respond to its effects remain contentious Even when such decisions claim to be guided by objective knowledge they are made and

implemented through political institutions and relationships and all the competing interests and power struggles that this implies Michael Mendez tells a timely story of people place and power in the context of climate change and inequality He explores the perspectives and influence low income people of color bring to their advocacy work on climate change In California activist groups have galvanized behind issues such as air pollution poverty alleviation and green jobs to advance equitable climate solutions at the local state and global levels Arguing that environmental protection and improving public health are inextricably linked Mendez contends that we must incorporate local knowledge culture and history into policymaking to fully address the global complexities of climate change and the real threats facing our local communities

Driven by Fear Guenter B Risse, 2015-12-30 From the late nineteenth century until the 1920s authorities required San Francisco's Pesthouse to segregate the diseased from the rest of the city Although the Pesthouse stood out of sight and largely out of mind it existed at a vital nexus of civic life where issues of medicine race class environment morality and citizenship entwined and played out Guenter B Risse places this forgotten institution within an emotional climate dominated by widespread public dread and disgust In *Driven by Fear* he analyzes the unique form of stigma generated by San Franciscans Emotional states like xenophobia and racism played a part Yet the phenomenon also included competing medical paradigms and unique economic needs that encouraged authorities to protect the city's reputation as a haven of health restoration As Risse argues public health history requires an understanding of irrational as well as rational motives To that end he delves into the spectrum of emotions that drove extreme measures like segregation and isolation and fed psychological ideological and pragmatic urges to scapegoat and stereotype victims particularly Chinese victims of smallpox leprosy plague and syphilis Filling a significant gap in contemporary scholarship *Driven by Fear* looks at the past to offer critical lessons for our age of bioterror threats and emerging infectious diseases

Organic Food and Farming in China Steffanie Scott, Zhenzhong Si, Theresa Schumilas, Aijuan Chen, 2018-10-03 Despite reports of food safety and quality scandals China has a rapidly expanding organic agriculture and food sector and there is a revolution in ecological food and ethical eating in China's cities This book shows how a set of social economic cultural and environmental conditions have converged to shape the development of a formal organic sector created by top down state developed standards and regulations and an informal organic sector created by bottom up grassroots struggles for safe healthy and sustainable food This is generating a new civil movement focused on ecological agriculture and quality food Organic movements and markets have typically emerged in industrialized food systems that are characterized by private land ownership declining small farm sectors consolidated farm to retail chains predominance of supermarket retail standards and laws to safeguard food safety and an active civil society sector The authors contrast this with the Chinese context with its unique version of capitalism with social characteristics collective farmland ownership and predominance of smallholder agriculture and emerging diverse marketing channels China's experience also reflects a commitment to domestic food security evolving food safety legislation and a civil

society with limited autonomy from a semi authoritarian state that keeps shifting the terrain of what is permitted The book will be of great interest to advanced students and researchers of agricultural and food systems and policy as well as rural sociology and Chinese studies *Turkey and EU Integration* Çigdem Nas,Yonca Özer,2017-05-18 What has been achieved regarding Turkey s efforts at integration to the EU and what obstacles remain to it achieving full membership Like other developing countries Turkey displays visible signs of advancement with rapid increases in living standards greater mobility and the rapid spread of technology Much of its legislation and political economic and administrative systems are also now aligned to the EU and this process has undoubtedly contributed to democratization and modernization At the same time problems in politics and society persist the Gezi protests limitations of freedom of expression frequent occupational accidents in the mining and construction sectors honour killings and political upheaval which has manifested itself most starkly with the recent coup attempt all call attention to the challenges facing a country in the process of change Charting the political legal and economic relations between Turkey and the European Union since 1959 this book explores the relationship through phases such as association customs union and candidacy Each chapter covers a particular period in the relations and or a theme which has both current and overall relevance to the conduct of the relations In this way the authors examine the impact of the EU in affecting change what has been achieved and the obstacles that remain Environmental Warfare in Gaza Shourideh C. Molavi,2024-02-20 Almost entirely written before the catastrophic events of late 2023 this book anticipates them exposing the brutal history of crimes against trees plants and the people who live with them along the 300 mile border zone between Gaza and Israel as nothing less than 75 years of colonization Laura Kurgan Professor Columbia University A timely and very essential addition for understanding the multi layered story of Gaza and that of Palestine Beyond the familiar warfare in Gaza the book presents a unique tale of Israeli violence to reengineer the Palestinian environment Ahmad Amara lawyer and lecturer Al Quds University Provides a much needed historical context to understand unfolding events in light of the long history of Palestinian liberation struggles through the lens of environmental history Paulo Tavares architect and author The engineered perimeter around the occupied Gaza Strip is formed by a sophisticated system of fences forts and surveillance technologies With each Israeli incursion a military no go area or a buffer zone is established along its borders extending deep into Palestinian communities and farmlands in Gaza These practices reproduce Israel s eco colonial imaginary further compounding the Gaza Strip s isolation from the rest of Palestine Since 2014 the bulldozing of Palestinian lands by Israeli occupation forces has been complemented by the unannounced aerial spraying of military herbicides extending the reach of Israeli colonial violence into the realm of chemical warfare The spraying has destroyed entire swaths of arable land in Gaza contributing to decades long practices that have forcibly changed a once lush Palestinian landscape This book is a vivid document of this aspect of Israeli eco colonial warfare and the strategies of anti colonial resistance adopted by Palestinians in Gaza as a result It includes original maps images and visualizations and collects new documents

original archival materials stills of drone footage first hand testimonies of farmers organizers and protesters and documents affected vegetation in Gaza as silent witnesses to Israeli settler colonial violence Shourideh C Molavi is a writer and scholar specializing in citizenship statelessness and human rights She is the dedicated Palestine Israel researcher at Forensic Architecture an independent research agency based in London and teaches at the Institute for the Study of Human Rights at Columbia University She is the author of *Stateless Citizenship The Palestinian Arab Citizens of Israel* **The Oxford Handbook of Irish Politics** David M. Farrell, Niamh Hardiman, 2021-09-01 Ireland has enjoyed continuous democratic government for almost a century an unusual experience among countries that gained their independence in the 20th century But the way this works in practice has changed dramatically over time Ireland's colonial past had an enduring influence over political life for much of the time since independence enabling stable institutions of democratic accountability while also shaping a dismal record of economic under development and persistent emigration More recently membership of the EU has brought about far reaching transformation across almost all aspects of Irish life But if anything the paradoxes have only intensified Now one of the most open economies in the world Ireland has experienced both rapid growth and one of the most severe crashes in the wake of the Great Recession On some measures Ireland is among the most affluent countries in the world yet this is not the lived experience for many of its citizens Ireland is an unequivocally modern state yet public life continues to be marked by formative ideas and values in which tradition and modernity are held in often uneasy embrace It is a small state that has ambitions to leverage its distinctive place in the Atlantic and European worlds to carry more weight on the world stage Ireland continues to be deeply connected to Britain through ties of culture and trade now matters of deep concern in the context of Brexit And the old fault lines between North and South between Ireland and Britain which had been at the core of one of Europe's longest and bloodiest civil conflicts risk being reopened by Britain's new hard edged approach to national and European identities These key issues are teased out in the 41 chapters of this book making this the most comprehensive volume on Irish politics to date The Post-Earthquake City Paul Cloke, David Conradson, Eric Pawson, Harvey C. Perkins, 2023-02-15 This book critically assesses Christchurch New Zealand as an evolving post earthquake city It examines the impact of the 2010-13 Canterbury earthquake sequence employing a chronological structure to consider damage and displacement recovery and renewal and the city in transition It offers a framework for understanding the multiple experiences and realities of post earthquake recovery It details how the rebuilding of the city has occurred and examines what has arisen in the context of an unprecedented opportunity to refashion land uses and social experience from the ground up A recurring tension is observed between the desire and tendency of some to reproduce previous urban orthodoxies and the experimental efforts of others to fashion new cultures of progressive place making and attention to the more than human city The book offers several lessons for understanding disaster recovery in cities It illuminates the opportunities disasters create for both the reassertion of the familiar and the emergence of the new highlights the

divergence of lived experience during recovery and considers the extent to which a post disaster city is prepared for likely climate futures The book will be valuable reading for critical disaster researchers as well as geographers sociologists urban planners and policy makers interested in disaster recovery
