**The Drone Memos** Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

**The Changing Practices of International Law** Tanja Aalberts, Thomas Gammeltoft-Hansen, 2018-04-05 With more than 158 000 treaties and some 125 judicial organisations international law has become an inescapable factor in world politics since the Second World War In recent years however international law has also been increasingly challenged as states are voicing concerns that it is producing unintended effects and accuse international courts of judicial activism This book provides an important corrective to existing theories of international law by focusing on how states respond to increased legalisation and rely on legal expertise to manoeuvre within and against international law Through a number of case studies covering a wide range of topical issues such as surveillance environmental regulation migration and foreign investments the book argues that the expansion and increased institutionalisation of international law itself have created the structural premise for this type of politics of international law

More international law paradoxically increases states political room of manoeuvre in world society **The Oxford Companion to the Economics of China** Shenggen Fan, Ravi Kanbur, Shang-Jin Wei, Xiaobo Zhang, 2014-10-30 China's rise as an economic powerhouse raises a number of questions that are the subject of lively debate How did the country do it How applicable are the lessons of China's economic reform of the past thirty years to the challenges it faces in the next three decades What does the detailed pattern of China's success and challenges look like at the sub sectoral and sub national levels and what does this mean for future policy How will China's role as a global economic player evolve The Oxford Companion to the Economics of China presents an original collection of perspectives on the Chinese economy's past present and future 99 entries written by the leading China analysts of our time The topics covered include the China model future prospects for China China and the global economy trade and the Chinese economy macroeconomics and finance urbanisation industry and markets agriculture and rural development land infrastructure and environment population and labour dimensions of wellbeing and inequality health and education gender equity regional divergence in China and a selection of perspectives on some of China's provinces The Editors are four global leaders in Chinese economic analysis and policy who between them have held or hold the following positions Director General International Food Policy Research Institute Co Editor China Economic Review President Chinese Economists Society Assistant Director of Research at the IMF Principal Adviser to the Chief Economist of the World Bank and Professors of Economics at Ivy League Universities **Decolonization and Conflict** Martin Thomas, Gareth Curless, 2017-06-15 Insurgency based irregular warfare typifies armed conflict in the post Cold War age For some years now western and other governments have struggled to contend with ideologically driven guerrilla movements religiously inspired militias and systematic targeting of civilian populations Numerous conflicts of this type are rooted in experiences of empire breakdown Yet few multi empire studies of decolonisation's violence exist Decolonization and Conflict brings together expertise on a variety of different cases to offer new perspectives on the colonial conflicts that engulfed Europe's empires after 1945 The contributors analyse multiple forms of colonial counter insurgency from the military engagement of anti colonial movements to the forced removal of civilian populations and the application of new doctrines of psychological warfare Contributors to the collection also show how insurgencies their propaganda and methods of action were inherently transnational and inter connected The resulting study is a vital contribution to our understanding of contested decolonization It emphasises the global connections at work and reveals the contemporary resonances of both anti colonial insurgencies and the means devised to counter them It is essential reading for students and scholars of empire decolonization and asymmetric warfare **National Uniform Legislation** Guzyal Hill, 2022-08-11 This book aims to develop a conceptual framework upon which to draw for analysis of new and existing national reforms in Australia Due to growth in the volume and complexity of national uniform legislation law reform agencies the Commonwealth state and territory governments and policy institutions have more rather than less to do This book explores how they are

**Technological Innovation in Legacy Sectors** William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don t head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying

conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system

Jones, 2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact

*The Betrayal* Kim Christian Priemel, 2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany s divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler s rise to power While the argument depending on individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials *The Betrayal* thus also explores how history underpins transitional trials as we encounter them in today s courtrooms from Arusha to The Hague

*A Call to Mission - A History of the Jesuits in China 1842-1954* David Strong, 2018-02-12 China has bulked large in the imagination of the Catholic Church for 500 years It had been central to the missionary dream of the

Jesuits for almost as long. However, only with this book's appearance has the detailed focus of attention shifted to the substantial and neglected period of Catholic and Jesuit engagement with China, the almost 120 years from the second arrival of the Jesuits Matteo Ricci, the polymath Ferdinand Verbeest and Adam Schall von Bell, the astronomers and the exquisite painter who influenced Chinese painting beyond measure. Giuseppe Castiglione, however, has been written about, made his mark and been the heart and soul of the first stage of Jesuit impact on China in the 17th and 18th Centuries. They brought Western learning and art to China and took Chinese language and literature to Europe. The Jesuits were the first multinational to be welcomed in China and they came with a specific method of engagement: to make friends, build relationships and share their gifts before anything else was transacted, including conversations about Christianity. It remains an unsurpassed method of engagement with a rich and ancient people. But the second arrival from the 1840s was very different. It was made possible by the arrival of European governments and traders, many of whom came not just for financial gain but to spread their superior religion. This work by David Strong in two volumes is the first major treatment of the period from the arrival of the European and eventually American Jesuit missionaries under the protection of the so-called Unequal Treaties through to their expulsion after the Communist victory in the long-running civil war in 1949. Volume 1, *The French Romance*, traces the people, projects, expansion and impact of those who provided the predominant Jesuit presence. At the height of its engagement with China, the French Government has 19 Consulates and attendant military and navy throughout China. The French Jesuits were afforded access and protection by their government and activated missions in northern and central China: schools, seminaries, universities, parishes, retreat houses, publications and attracted Chinese nationals to join their number.
