Livable Streets 2.0 Bruce Appleyard, 2021-03-22 Livable Streets 2.0 offers a thorough examination of the struggle between automobiles residents pedestrians and other users of streets along with evidence based practical strategies for redesigning city street networks that support urban livability In 1981 when Donald Appleyard's Livable Streets was published it was globally recognized as a groundbreaking work one of the most influential urban design books of its time Unfortunately he was killed a year later by a speeding drunk driver This latest update Livable Streets 2.0 revisited by his son Bruce updates the topic with the latest research new case studies and best human centered practices for creating more livable streets for all It is essential reading for those who influence future directions in city and transportation planning urban design and community regeneration and placemaking Incorporates the most current empirical research on urban transportation and land use practices that support the need for more livable communities Includes recent case studies from around the world on successful projects campaigns programs and other efforts Contains new coverage of vulnerable populations

The Oxford Handbook of the Sociology of Africa R. Sooryamoorthy, Nene Ernest Khalema, 2023 The Oxford Handbook of the Sociology of Africa presents a comparative analysis of sociological thinking in Africa Focusing on examples from Africa this diverse collection presents to a broad readership an accessible comprehensive up to date and topical analysis of sociological thinking in Africa Sociological discourse about African societies has been challenging and difficult due to a lack of both comprehensive analyses and holistic sociological evidence that covers Africa from past to present This Handbook locates African sociological thinking in historical context and takes a critical look at its current manifestations across the continent

Martian Gullies and their Earth Analogues S.J. Conway, J.L. Carrivick, P.A. Carling, T. de Haas, T.N. Harrison, 2019-01-21 Gullies on Mars resemble terrestrial gullies involved in the transport of abundant material down steep slopes by liquid water However liquid water should not be stable at the Martian surface The articles in this volume present the two main opposing theories for Martian gully formation climate driven melting of surficial water ice deposits and seasonal dry ice sublimation The evidence presented ranges from remote sensing observations to experimental simulations to comparison with Earth analogues The opposing hypotheses imply either that Mars has been unusually wet in the last few million years or that it has remained a cold dry desert both with profound implications for understanding the water budget of Mars and its habitability The debate questions the limits of remote sensing data and how we interpret active processes on extra terrestrial planetary surfaces even beyond those on Mars as summarized by the review paper at the beginning of the book
