Educart General Test Entrance Exam Guidebook *Measures and Determinants of Urban Food Security: Evidence from
Accra, Ghana* Tuholske, Cascade,Andam, Kwaw S.,Blekking, Jordan,Evans, Tom,Caylor, Kelly,2018-11-22 The urban
population in Africa south of the Sahara SSA is expected to expand rapidly from 376 million people in 2015 to more than 1 25
billion people by 2050 Measuring and ensuring food security among urban households will become an increasingly pertinent
task for development researchers and practitioners In this paper we characterize food security among a sample of low and
middle income residents of Accra Ghana using 2017 survey data We find that households tend to purchase food from
traditional markets local stalls and kiosks and street hawkers and rarely from modern supermarkets We characterize food
security using three established metrics the Household Food Insecurity Access Scale HFIAS the Household Food Insecurity
Access Prevalence HFIAP and the Food Consumption Score FCS We then estimate the determinants of food security using
general linear models The food security metrics are not strongly correlated For example according to HFIAP as many as 70
percent of households sampled are food insecure but only 2 percent fall below acceptable thresholds measured by FCS Model
results show that household education assets and dwelling characteristics are significantly associated with food security
according to HFIAS and HFIAP but not with FCS The poor correlation and weak model agreement between the dietary recall
metric FCS and the experience based metrics HFIAS and HFIAP call for closer attention to measurement of urban food
security Given Africa s urban future our findings highlight the need for an urban oriented comprehensive approach to the
food security of urban households Geography, Paper 2 ,1983 **Geography** ,2002 *Geography* Jenny
