Geography Pnovember 2013 Memo:

Stuck at Home Yasmin Y. Ortega, 2025-05-27 The Philippines is among the most successful migrant sending nations in the world both lauded and critiqued for exporting its own citizens to a global labor market Yasmin Y Ortega brings readers beyond this popular image to explore questions often overlooked What happens when workers who were encouraged to emigrate are suddenly unable to leave *Stuck at Home* examines how the Philippine state and its aspiring migrants negotiated the meaning of immobility amid the COVID 19 pandemic In this pioneering book Ortega studies the narratives that emerged around two groups of Filipino workers nurses banned from leaving the country and cruise workers who returned home after COVID 19 shut down the travel industry Ortega emphasizes the high stakes in telling the right story of immobility to a nation built around emigration one that provides a compelling rationale for who deserves to move and who can be forced to stay A gripping account of political interests frustrated dreams and an unprecedented crisis *Stuck at Home* reveals how migration governance is not only about regulating people s movement but also defining the meaning and implications of remaining in place

Fragmented Citizens Stephen M. Engel, 2016-05-24 A sweeping historical and political account of how our present day policy debates around citizenship and equality came to be The landmark Supreme Court decision in June 2015 legalizing the right to same sex marriage marked a major victory in gay and lesbian rights in the United States Once subject to a patchwork of laws granting legal status to same sex couples in some states and not others gay and lesbian Americans now enjoy full legal status for their marriages wherever they travel or reside in the country For many the Supreme Court s ruling means that gay and lesbian citizens are one step closer to full equality with the rest of America In *Fragmented Citizens* Stephen M Engel contends that the present moment in gay and lesbian rights in America is indeed one of considerable advancement and change but that there is still much to be done in shaping American institutions to recognize gays and lesbians as full citizens With impressive scope and fascinating examples Engel traces the relationship between gay and lesbian individuals and the government from the late nineteenth century through the present Engel shows that gays and lesbians are more accurately described as fragmented citizens Despite the marriage ruling Engel argues that LGBT Americans still do not have full legal protections against workplace housing family and other kinds of discrimination There remains a continuing struggle of the state to control the sexuality of gay and lesbian citizens they continue to be fragmented citizens Engel argues that understanding the development of the idea of gay and lesbian individuals as less than whole citizens can help us make sense of the government s continued resistance to full equality despite massive changes in public opinion Furthermore he argues that it was the state s ability to identify and control gay and lesbian citizens that allowed it to develop strong administrative capacities to manage all of its citizens in matters of immigration labor relations and even national security The struggle for gay and lesbian rights then affected not only the lives of those seeking equality but also the very nature of American governance itself *Fragmented Citizens* is a sweeping historical and political account of how our

present day policy debates around citizenship and equality came to be

Landscape, Memory, and Post-Violence in Cambodia James A. Tyner, 2016-11-16 Between 1975 and 1979 the Khmer Rouge regime in Cambodia enacted a program of organized mass violence that resulted in the deaths of approximately one quarter of the country's population. Over two million people died from torture, execution, disease, and famine. From the commodification of the killing fields of Choeung Ek to the hundreds of unmarked mass graves scattered across the country, violence continues to shape the Cambodian landscape. *Landscape, Memory, and Post-Violence in Cambodia* explores the on-going memorialization of violence. As part of a broader engagement with war, violence, and critical heritage studies, it explores how a legacy of organized mass violence becomes part of a cultural heritage and in the process how this heritage is produced. Existing literature has addressed explicitly the impact of war and armed conflict on cultural heritage through the destruction of heritage sites. This book inverts this concern by exploring what happens when sites of heritage, violence, are under threat. It argues that the selective memorialization of Cambodia's violent heritage negates the everyday lived experiences of millions of Cambodians and diminishes the efforts to bring about social justice and reconciliation. In doing so, it develops a grounded conceptual understanding of post-violence in conflict zones internationally.

The Routledge Handbook on Crime and International Migration Sharon Pickering, Julie Ham, 2017-07-14 The *Routledge Handbook on Crime and International Migration* is concerned with the various relationships between migration, crime, and victimization that have informed a wide criminological scholarship, often driven by some of the original lines of inquiry of the Chicago School. Historically, migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity, often in highly problematic ways. However, in the contemporary period, this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants. The *Routledge Handbook on Crime and International Migration* is also concerned with the theoretical, empirical, and policy knots found in the relationship between regular and irregular migration, offending, and victimization, the processes and impact of criminalization, and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders. The Handbook is focused on the migratory fault lines between the Global North and Global South, which have produced new or accelerated sites of state control, constructed irregular migration as a crime and security problem, and mobilized ideological and coercive powers usually reserved for criminal or military threats. Offering a strong international focus and comprehensive coverage of a wide range of border, criminal justice, and migration-related issues, this book is an important contribution to criminology and migration studies and will be essential reading for academics, students, and practitioners interested in this field.

The Changing Practices of International Law Tanja Aalberts, Thomas Gammeltoft-Hansen, 2018-04-05 With more than 158 000 treaties and some 125 judicial organisations, international law has become an inescapable factor in world politics since the Second World War. In recent years, however, international law has

also been increasingly challenged as states are voicing concerns that it is producing unintended effects and accuse international courts of judicial activism This book provides an important corrective to existing theories of international law by focusing on how states respond to increased legalisation and rely on legal expertise to manoeuvre within and against international law Through a number of case studies covering a wide range of topical issues such as surveillance environmental regulation migration and foreign investments the book argues that the expansion and increased institutionalisation of international law itself have created the structural premise for this type of politics of international law More international law paradoxically increases states political room of manoeuvre in world society *Ethnic Relations in Post-Soviet Russia* Andrew Foxall, 2014-10-03 While the collapse of communism in Russia was relatively peaceful ethnic relations have been deteriorating since then This deterioration poses a threat to the functioning of the Russian state and is a major obstacle to its future development Analysing ethnic relations in the North Caucasus this book demonstrates how a myriad of processes that characterised post Soviet transition including demographic change economic upheaval geopolitical instability and political re structuring have affected daily life for citizens It raises important questions about ethnicity identity nationalism sovereignty and territoriality in the post Soviet space Manhood Acts Michael Schwalbe, 2015-11-17 In *Manhood Acts* Michael Schwalbe offers a new perspective on the social construction of manhood and its relationship to male domination Schwalbe argues that study of masculinity has lost touch with its feminist roots and has been seduced by the politically safe notion of multiple masculinities *Manhood Acts* delineates the practices males use to construct women and men as unequal categories Schwalbe reclaims the radical feminist insights that gender is a field of domination not a field of play and that manhood is fundamentally about exerting or resisting control *Manhood Acts* arrives at the conclusion that abolishing gender as a system of oppression will require more than transgressive self presentation It will be necessary to end the exploitive economic relationships that necessitate manhood itself **The Meritocracy Trap** Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from

meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people Research Handbook on International Refugee Law Satvinder Singh Juss, 2019 In an age of ethnic nationalism and anti immigrant rhetoric the study of refugees can help develop a new outlook on social justice just as the post war international order ends The global financial crisis the rise of populist leaders like Trump Putin and Erdogan not to mention the arrival of anti EU parties raises the need to interrogate the refugee migrant citizen stateless legal and illegal as concepts This insightful Research Handbook is a timely contribution to that debate

From Cooperation to Partnership: Moving Beyond the Russia-EU Deadlock Bertelsmann Stiftung, 2013-11-25 Europeans can be proud as they look back on fifty years of peaceful integration Nowadays many people worldwide see the European Union as a model of how states and their citizens can work together in peace and freedom However this achievement does not automatically mean that the EU has the ability to deal with the problems of the future in a rapidly changing world The European Union must continue developing its unity in diversity dynamically be it with regard to energy issues the euro climate change or new types of conflict Indeed self assertion and solidarity are key to the debates shaping our future Europe in Dialogue wishes to make a contribution to these open debates The analyses in this series subject political concepts processes and institutions to critical scrutiny and suggest ways of reforming internal and external European policymaking so that it is fit for the future However Europe in Dialogue is not merely trying to encourage an intra European debate and makes a point of including authors from non EU states Looking at an issue from different angle or from afar creates a shift in perspective which in turn renders Europe's development more meaningful as it engages in critical dialogue with other societies

Self-determinable Development of Small Islands Masahide Ishihara, Eiichi Hoshino, Yoko Fujita, 2016-06-14 This book aims to clarify the present situation of the relations between small island countries and territories on the one hand and the great powers mainland areas and mega islands on the other and explores how small island countries and territories preserve and build their identity under globalization This book is divided into five parts The first part presents papers on issues that are related to Okinawa the American military presence the formation of a global human network and the history of and language revitalization in Okinawa The second part includes papers on security in East Asia and the Pacific Region the history of and present issues in international relations within the South and East China Sea areas The third part presents papers on economic issues and social developments on small islands The fourth part deals with ocean policies and marine resource management in the Pacific Region by the United States Australia and Japan Finally the

fifth part presents papers on the revitalization of three indigenous languages All the chapters of the book are based on the achievements of the research project Towards New Island Studies The Ryukyus as an academic node between East Asia and Oceania conducted by the International Institute for Okinawan Studies at the University of the Ryukyus This 5 year project was funded by the Japanese Ministry of Education Culture Sports Science and Technology and aimed to contribute academically to the creation of sustainable and self determinable societies in small island regions This work will be extremely useful and informative for readers in small island countries and territories and for researchers who are interested in small island issues to understand the current situation and who wish to consider effectual and feasible solutions **The Report:**

Oman 2014 Oxford Business Group,2014-01-15 The sultanate s economy continues to enjoy the benefits of petroleum wealth which has provided budget surpluses in most years and served as a backbone for growth However planning is well under way for an era in which oil will not be the main economic driver with the twin goals of diversification and creating an increased number of private sector jobs at the top of the government s current agenda Indeed in recent years the non OPEC oil exporter s economy has been undergoing a steady transformation reorienting from oil toward a more diverse set of service and industry based economic activities So far progress has been promising In 2011 oil and gas accounted for 38.8% of GDP With the continuation of higher than expected energy prices in 2012 the government has increased economic investments accordingly These investments which include infrastructure social programmes and small business development are aimed toward better preparing the country for its post fossil fuel future Moscow under Construction Robert

Argenbright,2016-07-26 Moscow under Construction explores the growth of place based opposition to destructive redevelopment practices in Moscow and the consequent changes in city s governance regime The groups of citizens discussed in this study have struggled to defend homes neighborhoods heritage buildings and historic districts and in the process they ve built up civil society and advanced democratization Heritage preservationists and other aggrieved Muscovites have organized themselves into initiative groups and social associations to protect specific places in the city and to influence the planning process and these place defenders have become more confident and capable as citizens Their activities also have caused Moscow s city government to shift along the political spectrum away from highly authoritarian and opaque habits of ruling toward a more open and collaborative governance regime *Towards a Political Economy of Resource-dependent Regions* Greg Halseth,Laura Ryser,2017-08-18 This book advances our understanding of resource dependent regions in developed economies in the 21st Century It explores how rural and small town places are working to find success in a new economy marked by demographic economic social cultural political and environmental change How are we to understand the changes and transformations working through communities and economies Where are the trajectories of change leading these resource dependent places and regions Drawing upon examples from Canada USA UK Australia New Zealand and the Nordic countries these and other questions are explored and addressed by constructing a critical political

economy framework of resource hinterland transition Towards a Political Economy of Resource Dependent Regions is a key resource for students and researchers in geography rural and industrial sociology economics environmental studies political science regional studies and planning as well as policy makers those in industry and the private sector and local and regional development practitioners **The Historiography of Persian Architecture** Mohammad Gharipour,2015-08-27

Historiography is the study of the methodology of writing history the development of the discipline of history and the changing interpretations of historical events in the works of individual historians Exploring the historiography of Persian art and architecture requires a closer look at a diverse range of sources including chronicles historical accounts travelogues and material evidence coming from archaeological excavations The Historiography of Persian Architecture highlights the political cultural and intellectual contexts that lie behind the written history of Persian architecture in the twentieth century presenting a series of investigations on issues related to historiography This book addresses the challenges complexities and contradictions regarding historical and geographical diversity of Persian architecture including issues lacking in the 20th century historiography of Iran and neighbouring countries This book not only illustrates different trends in Persian architecture but also clarifies changing notions of research in this field Aiming to introduce new tools of analysis the book offers fresh insights into the discipline supported by historical documents archaeological data treatises and visual materials It brings together well established and emerging scholars from a broad range of academic spheres in order to question and challenge pre existing historiographical frameworks particularly through specific case studies Overall it provides a valuable contribution to the study of Persian architecture simultaneously revisiting past literature and advancing new approaches This book would be of interest to students and scholars of Middle East and Iranian Studies as well as Architectural History including Islamic architecture and historiography **Cool** Steven Quartz,Anette Asp,2015-04-14 This engrossing history

merges evolutionary biology and economics to explain our spending habits and show how coolness is at the heart of consumerism Mental Floss We live in a world of conspicuous consumption where the things we buy not only satisfy our needs but also communicate our values identities and aspirations In Cool Steven Quartz and Anette Asp bring together groundbreaking findings in neuroscience economics and evolutionary biology to show how our concepts of cool be it designer jeans smartphones or craft beer help drive the global economy Cool puts forth a provocative theory of consumerism based on our brain s innate status seeking and social calculator The authors highlight the underlying processes that guide our often unconscious decision making They also pull back the curtain on choice architects who design store interiors as well as coolhunters who scour Berlin and Tokyo for the latest trends Quartz and Asp follow the evolution of cool consumption from the mid twentieth century through the emergence of the Internet in the 1990s finally unpacking the social motivations behind today s hip ethical consumption Taking us from Norman Mailer to normcore Cool is surprising at every turn and will forever change the way you think about money status and your next purchase *Mobility and Migration Choices* Martin van der

Velde, Ton van Naerssen, 2016-03-03 The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities This concerns both short distance mobility as well as long distance migration Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes This book tests the approach that three crucial thresholds need to be crossed before mobility occurs the individual's mindset about migrating the choice of destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there Thus both borders and trajectories can act as thresholds to spatial moves The threshold approach with its focus on processes affecting whether when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive perceive and undertake their transnational journeys This book examines the three constitutive parts discerned in the cross border mobility decision making process people borders and trajectories and their interrelationships Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility **Safety and Human Resource Law for the Safety Professional** Thomas

Schneid, 2019-03-20 The purpose of this text is to provide a one stop source for safety professionals to acquire a general knowledge regarding not only the OSH Act but also laws and standards which impact the safety profession on a daily basis The safety professional today does not work in a vacuum and decision making can be impacted by a myriad of other laws This new book will be the safety professional's go to text to acquire a quick understanding of the particular law potentially impacting his/her daily activities Features Includes safety laws as well as human resource laws Presents new OSHA whistleblower actions Encompasses updated contractor requirement under Wage and Hour laws Covers new NLRA decisions and actions Addresses e-commerce and social media issues involving the safety function **The Divided States of America**

Donald F. Kettl, 2022-03-15 As James Madison led America's effort to write its Constitution he made two great inventions the separation of powers and federalism The first is more famous but the second was most essential because without federalism there could have been no United States of America Federalism has always been about setting the balance of power between the federal government and the states and that's revolved around deciding just how much inequality the country was prepared to accept in exchange for making peace among often warring states Through the course of its history the country has moved through a series of phases some of which put more power into the hands of the federal government and some rested more power in the states Sometimes this rebalancing led to armed conflict The Civil War of course almost split the nation permanently apart And sometimes it led to political battles By the end of the 1960s however the country seemed to have settled into a quiet agreement that inequality was a prime national concern that the federal government had the responsibility for addressing it through its own policies and that the states would serve as administrative agents of that policy

But as that agreement seemed set federalism drifted from national debate just as the states began using their administrative role to push in very different directions The result has been a rising tide of inequality with the great invention that helped create the nation increasingly driving it apart

The Way Things Aren't: Deconstructing 'Reality' to Facilitate Communication John Backman, Malgorzata Wojczik, 2019-05-15 In a world of continual conflict rethinking the way we communicate with other cultures religions or nations is of paramount importance Standing in the way is the unconscious assumption that our own views reflect the way things are an assumption both inefficient and harmful The Way Things Aren t Deconstructing Reality to Facilitate Communication explores communication as a meeting point between different perceptions of reality presenting how our assumptions and convictions hinder effective communication with those who are different from us Featuring case examples from Somalia Romania and other regions the chapters describe how authorities and the media often create reality to relegate some people cultures languages or religions to the wrong side of the tracks Featuring scholars and practitioners from many disciplines this discussion challenges readers with the idea that in order to remain open for new perspectives we must be aware that things are not always the way things are
