Aid, Ownership and Development John Overton,Warwick Murray,Gerard Prinsen,Tagaloa Ulu,Nicola Wrighton,2018-08-06 One of the key principles for effective aid programmes is that recipient agencies exert high degrees of ownership over the agendas resources systems and outcomes of aid activities Sovereign recipient states should lead the process of development Yet despite this well recognised principle the realities of aid delivery mean that ownership is often compromised in practice Aid Ownership and Development examines this inverse sovereignty hypothesis with regard to the states and territories of the Pacific Island region It provides an initial overview of different aid regimes over time maps aid flows in the region and analyses the concept of sovereignty Drawing on a rich range of primary research by the authors and contributors it focuses on the agencies and individuals within the Pacific Islands who administer and apply aid projects and programmes There is indeed evidence for the inverse sovereignty effect particularly when island states and their small and stretched bureaucracies have to deal with complex and burdensome donor reporting requirements management systems consultative meetings and differing strategic priorities This book outlines important ways in which Pacific agencies have

proved adept not only at meeting these requirements but also asserting their own priorities and ways of operating. It concludes that global agreements such as the Paris Declaration on Aid Effectiveness in 2005 and the recently launched Sustainable Development Goals can be effective means for Pacific agencies to both hold donors to account and also to recognise and exercise their own sovereignty. *Mathematical Geography in American School Textbooks* Hugh Smith Rice, 1951

Global Health Impact Nicole Hassoun, 2020 Every year nine million people are diagnosed with tuberculosis every day over 13 400 people are infected with AIDs and every thirty seconds malaria kills a child. For most of the world critical medications that treat these deadly diseases are scarce, costly and growing obsolete as access to first line drugs remains out of reach and resistance rates rise. Rather than focusing research and development on creating affordable medicines for these deadly global diseases, pharmaceutical companies instead invest in commercially lucrative products for more affluent customers. Nicole Hassoun argues that everyone has a human right to health and to access to essential medicines and she proposes the Global Health Impact global health impact org new system as a means to guarantee those rights. Her proposal directly addresses the pharmaceutical industry's role: it rates pharmaceutical companies based on their medicines' impact on improving global health, rewarding highly rated medicines with a Global Health Impact label. Global Health Impact has three parts. The first makes the case for a human right to health and specifically access to essential medicines. Hassoun defends the argument against recent criticism of these proposed rights. The second section develops the Global Health Impact proposal in detail. The final section explores the proposal's potential applications and effects, considering the empirical evidence that supports it and comparing it to similar ethical labels. Through a thoughtful and interdisciplinary approach to creating new labeling, investment and licensing strategies, Global Health Impact demands an unwavering commitment to global justice and corporate responsibility.
