Earth and Mind II Kim A. Kastens, Cathryn A. Manduca, 2012. Articles refer to teaching at various different levels from kindergarten to graduate school with sections on teaching geologic time space complex systems and field work. Each section includes an introduction, a thematic paper and commentaries.

Rare Earth Frontiers Julie M. Klinger, 2018-01-15. Rare Earth Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics, green energy and medical technologies and essential telecommunications and defense systems. Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global. Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places. Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths. She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power. These include legally and logistically forbidding locations in the Amazon, Greenland and Afghanistan and on the Moon. Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents, this book examines the production of the rare earth frontier as a place, a concept and a zone of contestation, sacrifice and transformation.

**Special Papers**, 1934. Global Perspectives on Changing Secondhand Economies Karen Tranberg Hansen, Jennifer Le Zotte, 2022-02-23.

Providing interdisciplinary and global perspectives, this book examines historical and contemporary changes in secondhand economies, including the emergence and specialization of secondhand venues, the materials involved as well as the cultural significance of secondhand things and the professions associated with them. The objects in focus range from used clothing, scrap and waste materials to antiquities and used cars, thrift stores and circular economies. Growing concerns with sustainability in the West have helped bring about the rediscovery of practices of clothing re-use, re-purposing and re-cycling at the same time as major high street retailers are establishing programs to return used clothing to their stores for re-sale or recycling. As the contributions to this edited volume demonstrate, recent concerns with the fast pace and adverse effects of global commodity flows have increased the scholarly attention to secondhand economies both in terms of their history and their significance for livelihoods and sustainability. The chapters in this book were originally published as a special issue of

Duda Holoviak, 2024-03-12 This book provides a comprehensive examination of the Keystone State's formal and informal political institutions and players past and present and elucidates the place each holds in governing the commonwealth today. Covering a period of more than three hundred years, this volume presents a clear and succinct overview of the commonwealth's political history, culture, and geography, interactions between office holders, civil servants, special interest groups, and the media, policy development and implementation, how laws are created, enacted, and enforced, hierarchy and interaction among state, county, local, and special district government bodies and officials, tax collection and disbursement, and the political upheaval in the wake of the COVID-19 pandemic and the 2020 presidential election. Featuring practical appendixes and interviews with current and past office holders, bureaucrats, party leaders, and political journalists, this astute and informative book is an indispensable tool for understanding politics in the Keystone State.

**The End of Public Schools** David W. Hursh, 2015-10-16 *The End of Public Schools* analyzes the effect of foundations, corporations, and non-governmental organizations on the rise of neoliberal principles in public education. By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians, it describes how specific policies that limit public control are advanced across all levels. Informed by a thorough understanding of issues such as standardized testing, teacher tenure, and charter schools, David Hursh provides a political and pedagogical critique of the current school reform movement as well as details about the increasing resistance efforts on the part of parents, teachers, and the general public.

Volunteers in Sport: International perspectives Geoff Nichols, 2016-03-23

Volunteers are central to providing opportunities to play sport whether helping to run sports clubs helping in school sport or at sports events This volume focuses on the volunteers who support clubs Approximately 150 000 sports clubs in the UK are supported by volunteers in roles such as coaches treasurers membership secretaries and other formal roles as well as a myriad of other volunteers who help on a more informal basis This structure of clubs run by volunteers is common to other countries such as Germany Canada Finland and Australia It is a valuable community resource not only for the opportunities it provides for sports participation but also the more general contribution to the quality of communities This club structure has been central to government policy to increase sports participation and has developed from the second half of the 19th century Yet its maintenance relies on a nucleus of core volunteers in each club who take the major roles Recruiting new volunteers especially for these core roles is always difficult Despite central government in the UK having a commitment to developing volunteering clubs are having to adjust to new relationships with local government as funding and subsidy of facility use is reduced Trends in sports participation are away from the traditional team sports and towards more individual participation Club members may demand an experience benchmarked against private or local government providers regarding the club as providing a service as much as an organisation they contribute to The chapters in this book contribute an international perspective to understanding these issues It will be of great value to community sport leaders and scholars of sport sociology and leisure studies This book was published as a special issue of the International Journal of Sport Policy and Politics
