Rebuilding Rose: The Tale of an Atkins Jim Spaulding, One afternoon in 1997 an unsuspecting Jim Spaulding arrived home from work to learn that his wife Cheryl had rescued a dilapidated 25 foot galf rigged sloop from a date with the incinerator Over the next six years the Spauldings along with a colorful cast of family and friends faithfully restored the Atkins design Rose to its original beauty This is their engaging story Arranged chronologically the tale of Rose culminates with the maiden voyage of the restored vessel on the Chesapeake Bay but not before readers are treated to an entertaining and illustrated journey through the entire restoration process While most of the story takes a how they did it approach several sections explain unique tasks in the restoration The comprehensive treatment is illustrated with dozens of photographs and detailed drawings All of these technical details are told in Spaulding s self effacing voice and presented in the context of anecdotal stories and interesting characters who include a laidback ship s carpenter a crusty gunnery sergeant a mast shimmying sailmaker and the motley crew of the Bay Boat works on the Chesapeake Bay

Total Garbage Edward Humes, 2025-02-04 An investigative narrative that dives into the waste embedded in our daily lives and shows how individuals and communities are making a real difference for health prosperity quality of life and the fight against climate change by a Pulitzer Prize winning journalist What happens to our trash Why are our oceans filling with plastic Do we really waste 40 percent of our food 65 percent of our energy Waste is truly our biggest problem and solving our inherent trashiness can fix our economy our energy costs our traffic jams and help slow climate change all while making us healthier happier and more prosperous This story driven and in depth exploration of the pervasive yet hard to see wastefulness that permeates our daily lives illuminates the ways in which we ve been duped into accepting absolutely insane levels of waste as normal Total Garbage also tells the story of individuals and communities who are finding the way back from waste and showing us that our choices truly matter and make a difference Our big environmental challenges climate energy plastic pollution deforestation toxic emissions are often framed as problems too big for any one person to solve Too big even for hope But when viewed as symptoms of a single greater problem the epic levels of trash and waste we produce daily the way forward is clear Waste is the one problem individuals can positively impact and not just on the planet but also on our wallets our health and national and energy security The challenge is seeing our epic wastefulness clearly Total Garbage will shine a light on the absurdity of the systems that all of us use daily and take for granted and it will help both individuals and communities make meaningful changes toward better lives and a cleaner greener world
