Cathles,2015-03-08 Approximately 12 000 years ago at the end of the last ice age the three kilometers of ice that covered Canada the large European glaciers in Fennoscandia and Siberia and many other minor glaciers melted

quickly The resulting meltwaters increased the depth of the world's oceans by about 110 meters The earth's response to this redistribution of loads was one of fluid flow By studying the way in which that flow occurred much can be learned about the viscosity structure of the earth's mantle that is how the fluid properties of the earth vary with depth In this volume Lawrence M Cathles III sets out to lay the theoretical foundations necessary to model the isostatic fluid adjustment of a self gravitating viscoelastic sphere such as the earth and to use these foundations together with geological evidence of the way the earth responded to the pleistocene land redistributions to study the viscosity of the mantle The author argues that the viscosity of the entire mantle is very close to 10²² poise except for a low viscosity channel about 75 kilometers thick in the uppermost mantle This conclusion differs sharply from the common view that the earth's mantle becomes very viscous 10²⁷ poise below a depth of about 1000 kilometers Originally published in 1975 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Beholding Beauty Jason R. McConnell, 2022-03-15 Beholding Beauty Worshiping God through the Arts casts a vision for how the church can integrate a theology of beauty and aesthetics into its worship practices Unlike other books that only explore beauty and aesthetic in the abstract Beholding Beauty is a practical theology that inspires Christians to intentionally incorporate the arts into their everyday lives and their church's weekly worship services It is specifically designed for pastors and worship leaders who wish to craft theologically coherent aesthetically invigorating and artistically stimulating worship services and for all Christians who desire to contemplate the nature of beauty and art from a biblical theological and liturgical perspective Whether you are an accomplished artist or a novice to the art world this book will deepen your understanding of God as the original artist who uniquely calls human beings to cocreate with him It will challenge your presuppositions and convictions about the place of beauty and art in the Christian life and the life of the church It encourages Christian artists to be even more creative and prolific and it compels non artists to consider the artistic gifts and talents God has given them
