

Alerts and Delta T Diagnostics with the Prestige® 2.0 IAQ Thermostat

MOUNTING LOCATIONS

Refer to the guidelines below and Fig. 1–5 for mounting locations of the Discharge and Return Air Temperature Sensors.

Discharge Air Temperature Sensor Mounting Location

1. Mount the Discharge Air Temperature Sensor on the supply duct in a location where the air is mixed well. Mount the Discharge Air Temperature Sensor out of sight of the A-Coil/Heat Exchanger when possible. See Fig. 1.
2. When possible, mount the Discharge Air Temperature Sensor upstream of a Steam Humidifier, a Fan Powered Humidifier or a Dehumidifier that is ducted to the supply. See Fig. 2–3.
3. If space does not allow a Discharge Air Temperature Sensor upstream of a Steam Humidifier or Fan Powered Humidifier, mount the Discharge Air Temperature Sensor downstream of the Humidifier. See Fig. 2. When setting the Delta T Limits (see "Set Delta T Limits" on page 5), be sure to consider the affect that the humidifier has on Delta T.
4. If a Bypass Humidifier is installed, the Discharge Air Temperature Sensor can be mounted downstream or upstream of the Bypass Humidifier. Mounting the sensor downstream of the Bypass Humidifier is the preferred location, because the air is mixed well. See Fig. 4–5.

INSTALLATION INSTRUCTIONS

Return Air Temperature Sensor Mounting Location

1. Install the Return Air Temperature Sensor on the return duct in a location where the air is mixed well. Mount the Return Air Temperature Sensor downstream of a Bypass Humidifier, Dehumidifier or Ventilator. See Fig. 1–5.

Controls and Automation for Facilities Managers Viktor Boed, 1998-06-23 Building owners and managers expect fully automated and energy efficient operations on line diagnostic of systems parameters to prevent failures and on line diagnostic of problems prior to exposing occupants to deteriorating environmental conditions. A simple HVAC control is no longer acceptable by current standards. Controls and Automation for Facilities Managers examines principles and applications of HVAC engineering outlining information for design development of operations logic systems diagnostics and building of environmental conditions with reliability and minimum operating cost. The book moves from the principles of mechanical engineering related to HVAC systems through DDC applications engineering thereby summarizing complex topics of electrical engineering for mechanical engineers. Individual chapters provide essential information on related mechanical HVAC engineering controls strategies and examples of basic algorithms for on line diagnostics. Guide DDC application engineers to a more thorough understanding of mechanical engineering disciplines i.e. the psychrometric chart as well as guide mechanical engineers to a more thorough understanding of DDC applications engineering i.e. direct digital controllers and systems. Outline information on current topics. Discussions also include Indoor air quality presenting material for facilities engineers as well as controls and consulting engineers. Utilities metering describing the distribution of real time data over a network including consumption alarms diagnostics trends and reports. On line problem diagnostics outlining HVAC and environmental problems. Controls and Automation for Facilities Managers serves as an exceptional guide for facilities managers and engineers architects and consulting engineers vendors and contractors and other professionals in the design application and implementation of controls and automation systems for industrial educational institutional and governmental facilities. This reference will enhance design systems implementation systems operation and maintenance effecting the ultimate goal of its readers implementation of fully automated environmental control systems trouble free operation and optimization of operating and maintenance cost.
