Hospice Volunteer Training Manual Ontario:

The Changing Face of Volunteering in Hospice and Palliative Care Ros Scott, Steven Howlett, 2018-04-19

Volunteers have a long been involved in supporting the delivery of palliative care Indeed in some countries the range and quality of hospice and palliative care services depends on the involvement of volunteers Hospice and palliative care services and volunteering are changing As society develops so too does volunteering Volunteers have growing expectations of organizations and increasingly seek roles that meet their needs and aspirations rather than fitting in with organizational approaches As hospice and palliative care services experience increasing and changing demands for their services due to aging populations with complex healthcare needs we need to recognize that volunteers have a vital role to play in supporting the delivery of services of the future The Changing Face of Volunteering in Hospice and Palliative Care explores the complex phenomenon that is volunteering in hospice and palliative care in different countries It considers how and why volunteering is changing through the contributions of authors from Western and Eastern Europe North America Australia Africa and India It reflects on the influence of culture and organisational contexts in addition to management approaches legislative and political influences highlighting factors that contribute to the success of volunteering Contributing to knowledge and understanding in the field of volunteering in hospice and palliative care internationally this book highlights the factors that contribute to the success of volunteering models allowing readers to see possibilities for change and find new ideas for innovative practice in their own setting International Handbook of Educational Policy Nina Bascia, Alister

Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over 40 chapters written by nearly ninety leading researchers from a number of countries It is organized into 6 broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contrasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy Resources in Education ,1984 **Associations**
