

SOFTWARE REQUIREMENTS SPECIFICATION

Hospital Management System

Introduction:

This is a Software Requirements Specification (SRS) for the Hospital Management System. It describes the functions, goals and tasks that the system can perform. This is used to describe the scope of the project and to plan for the system's design and implementation.

The following features are the high-level requirements that this system satisfies:

- Work Scheduling and doctors to - Assigning nurses to doctors patients
- Admissions - Admitting patients, assigning the patients to appropriate wards
- Patient Care - Monitoring patients while they are in the hospital
- Surgery Management - Planning and organizing the work that surgeons and nurses perform in the operating rooms
- Ward Management - Planning and coordinating the management of wards and rooms
- Waiting list - Monitoring to see if there are any patients waiting for available beds, assigning them to doctors and beds once these become available

The Requirements are classified into two categories:

- Functional requirements
- Non-functional requirements.
