Hospitals Of London:

Venereal Disease, Hospitals, and the Urban Poor ; London's "foul Wards," 1600-1800 Kevin Patrick Siena, 2004
This book explores how London society responded to the dilemma of the rampant spread of the pox among the poor. Some have asserted that public authorities turned their backs on the foul and only began to offer care for venereal patients in the Enlightenment. An exploration of hospitals and workhouses shows a much more impressive public health response. London hospitals established foul wards at least as early as the mid sixteenth century. Reconstruction of these wards shows that far from banning paupers with the pox, hospitals made treating them one of their primary services. Not merely present in hospitals, venereal patients were omnipresent. Yet the foul comprised a unique category of patient. The sexual nature of their ailment guaranteed that they would be treated quite differently than all other patients. Class and gender informed patients' experiences in crucial ways. The shameful nature of the disease and the gendered notion of shame itself meant that men and women faced quite different circumstances. There emerged a gendered geography of London hospitals as men predominated in fee-charging hospitals while sick women crowded into workhouses. Patients frequently desired to conceal their infection. This generated innovative services for elite patients who could buy medical privacy by hiring their own doctor. However, the public scrutiny that hospitalization demanded forced poor patients to be creative as they sought access to medical care that they could not afford. Thus *Venereal Disease, Hospitals, and the Urban Poor* offers new insights on patients' experiences of illness and on London's health care system itself. Kevin Siena is Assistant Professor of History at Trent University.

Hospitals and Asylums of the World: Hospital construction, with plans and bibliography. 1893. Portfolio of plans ... the best British ... and foreign hospitals. 1893 Sir Henry C. Burdett, 1893 **The Modern Practice of the London Hospitals ... A New Edition, with an Useful Index of Diseases, and Their Remedies** Hospitals (LONDON), 1785 *Walking London's Medical History Second Edition* Nick Black, 2021-09-01 Highly Commended BMA Medical Book Awards 2013. The history of health care is complex, confusing, and contested. It involves more than just the creation of hospitals and dispensaries, infirmaries, and health centers. There are also royal colleges, trades unions, medical schools, nurses' homes, coroners' courts, nursing sisterhoods, ambulance stations, patients' organizations, and medical missions. Usually, to enhance our understanding, we sit and read books or nowadays surf the Internet. But it's more fun to go out, visit the buildings where events unfolded, and transport yourself back in time. The story of how health care has developed from medieval times to the present day is told through seven walks in central London, each with a key theme such as Competition between the church, crown, and city for control; Changing fortunes of particular districts; Radical reform between 1840 and 1880; Individual creativity and entrepreneurship; Hospitals: unavoidable choice between merger or migration; Transformation of health care trades into professions; Development of primary care. The book takes as much interest in one of the six ambulance stations built in 1915 by the London County Council as it does in the grandest teaching hospital. Although some

important buildings have been destroyed and others are threatened many remain The walks aim to help preserve our legacy as increasingly former health care buildings are converted into hotels offices homes and shops Awareness of their original functions is in danger of being lost The book also aims to increase our understanding of the current challenges we face in trying to improve health care For there are many lessons to be learnt from the past Packed full of curious and surprising facts about medicine and beautifully illustrated with maps photographs and images this is the perfect guide book for anyone with a passion for urban walks the history of London and of course medicine
