Patients with sensitive skin often pose a problem for skincare specialists First as their complaints are often subjective burning itching tightness and tingling which cannot be seen with the naked eye it is not always clear what to work with and how to diagnose and evaluate the therapy outcomes Second for many people skin hypersensitivity is typically initiated by cosmetics which is the main skincare tool so skincare practitioners may avoid such clients who likely expect cosmetics used in treatment to only make things worse Yet this is not the case as the right cosmetic care and treatment can take away the unpleasant symptoms thereby contributing to a significant improvement in the quality of life for people with sensitive skin This book was created to help dermatologists and other skincare professionals better understand this syndrome allowing them to tailor their correction protocols to each case For this purpose we have gathered
